

THEME: LIVING TOGETHER IN UGANDA**TOPIC: LOCATION OF UGANDA ON THE MAP OF EAST AFRICA****Maps and pictures**

A map is a drawing /representation of an object as seen from above. (Pupils will draw the map of the school and class)

A picture is a drawing of an object as seen from above.

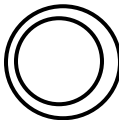

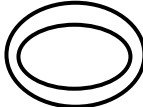

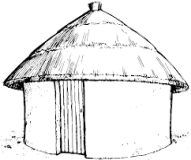

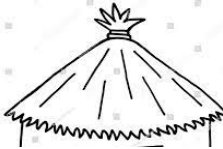

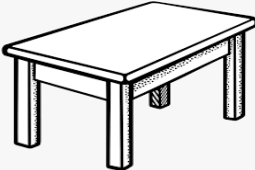

Difference between maps and pictures.

- i. A map is seen from above while picture is seen from sides
- ii. A picture is more detailed than a map.

Similarities between maps and pictures

- i. Both represent objects
- ii. Both are drawn

Maps and pictures of different objects

object	picture	map
A tree		
A pot		
A cup		
A hut		
A table		

A house		
A bus		

Types of maps

- Topographic maps: -these are maps that show physical features of a given area
- Thematic maps: -these are maps that show various social and economic themes e. g trade, energy etc.

Importance of maps

- They are used to locate places
- They help travelers to plan for routes
- They help people to know they relief, vegetation and climate of different areas.

Elements of a map

- Compass direction
- A title
- A key
- A scale
- A frame

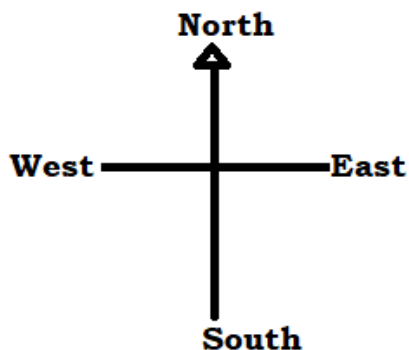

Compass direction

A compass direction is an instrument used to find direction of places.

A compass direction is an element on a map used to find direction of places on a map

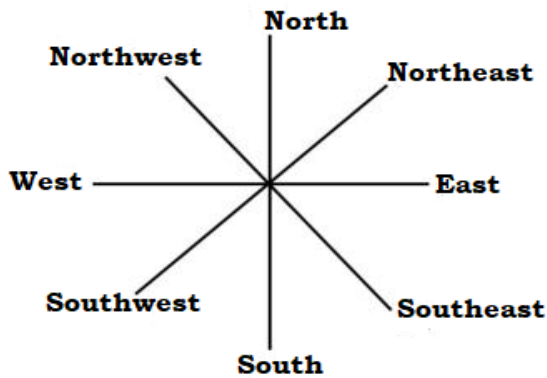

Cardinal points

These are major points of a compass

Secondary points

These are directions that lie midway of cardinal points. These include:
South east, South west, North west, North east.

Tertiary points

These are directions that lie between cardinal points and semi cardinal secondary points

These include: -

North north East

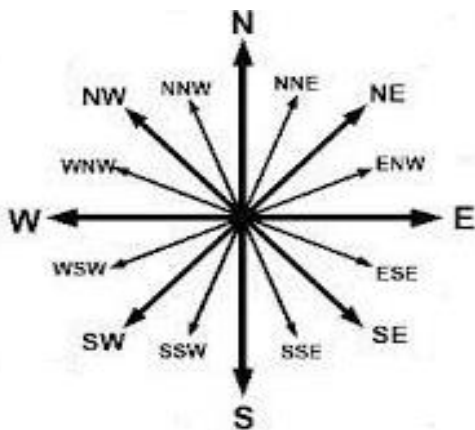

East north east

East south east

South south east

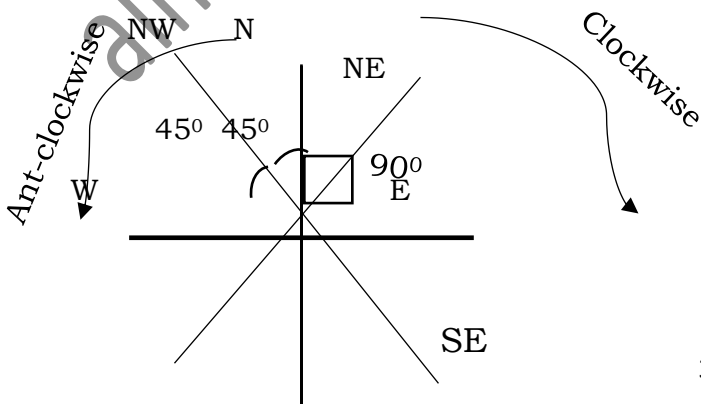

South south west

North north west

Degrees on a compass direction

Cardinal points lie 90° from each other. Secondary points lie 45° from cardinal point

Pupils are expected to move in a clockwise or anti- clockwise manner.

Pupils are expected to move the different degrees.

Other ways of finding directions

- i. Using the position of the sun
- ii. Using body parts

Using the position of the sun

In the morning, the sun is in the eastern direction and in the west direction during evenings and afternoon.

A person can therefore find direction of places during the day depending on the position of the sun.

(Pupils will go outside the class to identify the position of the sun and use their bodies to find direction.

Using body parts

This method works hand in hand with the position of the sun. In the evening, the sun appears to set in the west. Therefore, if one stretches the left hand in the evening to point to the sun and stretches the right hand to the opposite direction, the left hand will be pointing to the west while the right hand will be pointing to the east. He/she will be facing in the north and the back will be showing the south.

Question

Mention two groups of people who use a compass.

Map key

A map key is an element of a map that is used to interpret/explain map symbols

Map symbols are features that are used to represent real objects on a map.

Why symbols are used on maps

- To avoid congestion on the map
- To make map reading easy
- To ensure neatness on a map

NB: Blue and green are some of the common colours used on maps

Some common symbols use on maps

Rift valley	Water fall	Dam	Canal	Swamp
hill	Railway line	Mountain peak	Mountain	Contours
Permanent lake	Seasonal lake	Factory	Compass direction	Church
Port	Bridge	Grassland	Airport	Hospital
Quarry	mine	Scale		

Map scale

A scale is an element of a map that is used to calculate the actual ground distance on a map.

Types of scale

i) Linear scale

This is the type of scale drawn using lines that are divided into equal parts.

Drawing

i) Representative scale:

This is a type of scale written as a mathematical fraction e.g., $\frac{1}{10}$ km or 1:10km

i) Statement scale

This is the type of scale that is given as a statement eg: 1cm on a map represents 10km on the ground.

Map frame

It encloses a map. It shows the extent of the area represented by the map.

Map title

A map title is an element of a map that helps one to know what the map is about.

Activity

1. Define a map
2. What term is used to mean a drawing of an object as seen from sides?
3. What makes a map different from a picture?
4. How is a map similar to a picture?
5. Draw the picture and a map of the following objects
 - i) Pot
 - ii) Tree
 - iii) table
6. state two ways how maps are important to people.
7. List four main elements of a good map
8. What is the difference between a compass and a compass direction
9. What are tertiary points?
10. John was facing north, he moved 90° clockwise. What was John's new direction?
11. Mary was facing west, she turned at an angle of 45° anti-clockwise. What new direction did she face.
12.
 - a) Joseph was going to school in the morning, she saw her shadow on the left-hand side. Which direction was he heading.
 - b) Jane was going home from school, she saw her shadow in front of her. Which direction was her home?
13. Why are symbols used on maps. State two reasons
14. Draw the following map symbols.
 - a) Waterfall
 - b) Rift valley
 - c) Mountain peak
 - d) Hill
 - e) Quarry
15. Which problem is a map reader likely to face when reading a map without:
 - a) Key
 - b) Title
16. Identify at least two common colours used on maps.
17. The distance from point A to B is 5cm. calculate the actual ground distance with a scale of 1cm:10km.

LOCATION OF UGANDA ON THE MAP OF EASTAFRICAN

Location is where something is found

Ways of locating places on the map

- i) By using the grid reference
- ii) By using the neighbouring areas

Ways of locating places in the environment

- a) By using landmarks e.g.: buildings, lakes etc.
- b) By using a map
- c) By using neighbouring places

Identifying places that can be used to locate NPPS/their homes.

LOCATING PLACES USING GRID REFERENCE

Grid reference: is the method of locating places using lines of latitude.

Lines of latitude: are imaginary lines drawn on a map from east to west.

Lines of longitude: are imaginary lines drawn on a map from the north pole to the south pole.

Latitude is the distance north or south of the equator.

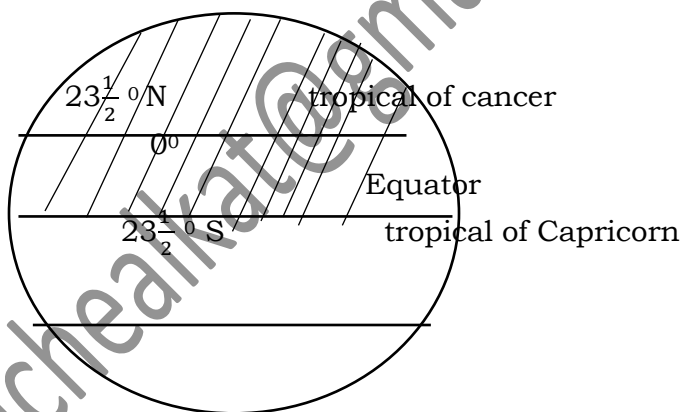

Longitude: is the distance east or west of the prime meridian

Major lines of latitude:

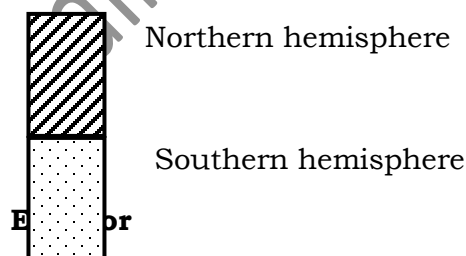

The general name for all lines of latitude is parallels because they do not meet at any point

Major lines of latitude include;

- i) The equator (0°)
- ii) Tropical of cancer $23\frac{1}{2}^{\circ}$ N
- iii) Tropical of Capricorn $23\frac{1}{2}^{\circ}$ S

Key

1. The equator divides the world into the Northern hemisphere and the southern hemisphere
2. The equator is marked 0° because all other lines of latitude are marked after it.
3. The equator crosses lake George and Lake Victoria.
4. Districts crossed by the equator include:

- Kasese
- Mukono
- Mpigi
- Ibanda
- Bukomansimbi
- Buvuma
- etc.

Pupils use maps in their atlases to identify

- i) Districts crossed by the equator
- ii) Districts that lie in the northern or southern hemisphere
- iii) Physical features that are crossed by the equator

Equinox

Equinox is the period of the year when the sun is overhead the equator

Characteristics of the equinox

- i) There is high temperature
- ii) The hours during the day are the same during night.
- iii) A lot of rainfall is received

Dates the equinox is experienced in Uganda

- 21st march
- 23rd September

Question: identify the importance of the lines of latitude

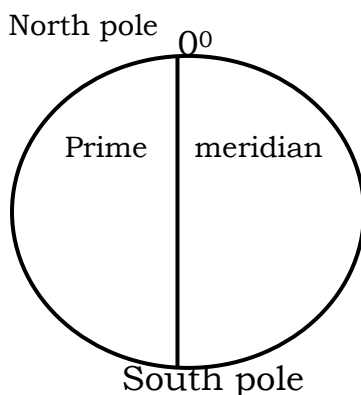

Major lines

The prime meridian is the major line of longitude. it divides the earth into western hemisphere and eastern hemisphere.

The prime meridian is marked 0° it is at times called Greenwich meridian because it crosses a town called Greenwich in London.

Another name for lines of longitude is meridians

The international date line is another important line of longitude. it is marked 180° E/W and it determines date/day.

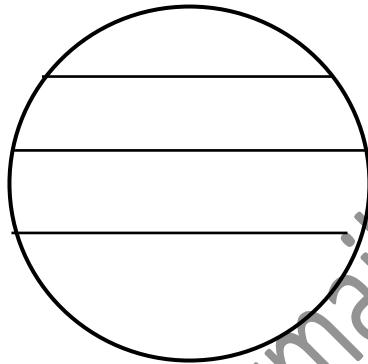

Importance of lines of longitude

- i) They help to determine time
- ii) They help to locate places on the map.

NB: The rotation of the earth causes days and nights. The evolution of the earth causes changes in seasons.

Activity

- 1. What is a hemisphere?
- 2. Name the most important;
 - a) Lines of latitude
 - b) Line of longitude
- 3. Why is the equator marked 0°
- 4. Name two lakes crossed by the equator
- 5. Mention two parts of the world formed by the prime meridian
- 6. Study the diagram below and answer questions that follow

- a) What name is given to the shaded part?
- b) Name lines marked:
A _____
B _____
- c) Indicate degrees on the lines marked a and b using the diagram globe. Find the difference between lunar and leap year.
- 7. Write down three districts crossed by the equator in Uganda.
- 8. Mention the importance of lines that determine
 - i) Day
 - ii) Time
- 9. Using the atlas, write one district completely found in the following hemisphere in Uganda.
 - i. Northern hemisphere
 - ii. Southern hemisphere
- 10. Why are lines of latitude at times called parallels?

Locating Uganda on the map of East Africa

(Diagram)

Regions that make up Uganda (map of Uganda)

Qn: Use the atlas and identify at least five districts in each region.

Reasons why Uganda is divided into districts

- i) To ease administration
- ii) To extend social services nearer to people
- iii) To create more job chances for people.

Creation of districts leads to separation of communities/tribes and high administrative costs.

Highland districts

Highland districts are districts found in areas of high altitude

Examples of highland districts

Mbale	Kasese
Kapchorwa	Bundibugyo
Kabale	Moroto

Economic activities commonly carried out in highland districts

Tourism

Crop growing

Mining

Problems faced by people living in highland districts

- i) Landslides
- ii) Poor transport network
- iii) Severe soil erosion
- iv) Very cool temperatures

Possible solutions to problems facing people living in highland districts

- i) By constructing winding roads
- ii) By terracing, contour ploughing
- iii) By rearing donkeys to use them as means of transport
- iv) By planting trees

Island districts

An island is an area of land which is surrounded by a water body.

Examples of island districts

Kalangala

Buvuma

Economic activities carried out in island districts

Fishing

Tourism

Lumbering

Crop cultivation (oil palm growing)

NB: Kalangala favours the growing of oil palm because the area receives reliable rainfall and the fertility of soil.

Products from oil palm include; cooking oil, palm wine, palm oil, soap

Benefits enjoyed by people in island districts

- i) They have easy access to water
- ii) They have fertile soil
- iii) They receive reliable rainfall.

Problems faced by people living in island districts

- i) Lack of hydro electricity
- ii) Floods
- iii) Attacks from dangerous water animals
- iv) Poor social services.

Possible solutions to problems facing island districts of Uganda

- i) By using other sources of energy e.g., solar energy
- ii) By employing more social service provider.
- iii) By building better social service centres in island districts.

Activity

1. In which region of Africa is Uganda found?
2. How is Uganda and Kenya similar in terms of location?
3. Name the regions in Uganda and at least two districts in each region.
4. State two reasons why Uganda is divided into districts
5. Identify one disadvantage of creating districts
6. List two examples of highland districts
7. Mention one economic activity carried out in highland districts
8. Identify two problems faced by people living in highland areas
9. How can the problem of severe soil erosion in highland areas be reduced?
10. Identify one benefit enjoyed by people who live in island areas.
11. State two problems faced by people who live in island districts of Uganda.
12. If the people of Kalangala district lack access to hydroelectricity. Suggest any one kind of electricity they can use.

Neighbouring countries of Uganda

Country	Direction from Uganda	Direction to Uganda	Capital city	Current president
Kenya	East	West	Nairobi	HE William Ruto
Tanzania	South	North	Dodoma	HE Samia Hussan
DRC	West	East	Kinshasa	HE Felix Tshisekedi
South Sudan	North	South	Juba	HE Salva Kiir
Rwanda	Southwest	North East	Kigali	HE Paul Kagame

Uganda as a landlocked country

A landlocked country is a country without a sea port of its own

Landlocked countries that border Uganda are South Sudan and Rwanda

Qn: Identify landlocked countries that neighbour Uganda using the atlas

Problem faced by landlocked countries

- i) Delay of goods in transit
- ii) High transport costs when importing and exporting goods
- iii) High taxation on imports

Solution to problems faced by landlocked countries

- i) Developing air transport
- ii) Joining common markets
- iii) Using various sea ports when importing or exporting goods.

Seaports that handle Uganda's imports and exports

Port Mombasa in Kenya

Port der- es- salaam in Tanzania

Identifying the seaports that handle Uganda's goods on the map of east Africa using the Atlas

A seaport is a place at the coast where ships anchor

A hinterland is an area served by the seaport e.g., Uganda, Kenya

Non-landlocked countries that neighbour Uganda

Kenya

Tanzania

DRC

Qn: What is a non-landlocked country?

Benefits enjoyed by non- landlocked countries

- i) They pay less tax on imports
- ii) Their imports do not delay in transit
- iii) They earn income from taxing countries that use their seaports.

Reasons why Uganda should cooperate with her neighbours

- i) To widen market for her goods
- ii) To use her neighbour seaport
- iii) To get goods she can't produce locally

Activity

1. Why is Uganda referred to as a land **locked country**?
2. Name two landlocked countries that boarder Uganda
3. State two problems Uganda faces due to her location
4. How is Uganda different from Kenya in terms of location?
5. Name the sea port that handles most of Uganda's exports and imports.
6. Why does Uganda mostly use the above seaport to handle her imports and exports?
7. Give any two ways Uganda can solve the problems she faces due to her location
8. Give any two reasons why Uganda should cooperate with her neighbours.

TOPIC:2: PHYSICAL FEATURES OF UGANDA

Introduction to physical features

Physical features are land forms of the earth's surface

Examples of physical features

Mountains

Hills

Lakes

Rivers

Plateau

Rift valley etc.

Types of physical features

Relief features

Drainage features

Relief features

Relief features are landforms identified by their altitude

Examples of relief features

Mountains

Hills

Plains

Plateaus

Rift valley

Valleys

Mountains in Uganda

A mountain is a high large piece of land higher than a hill. A piece of land much higher than the surrounding area

A peak is the highest point of a mountain

A range is a chain of mountains

Mountains in Uganda include Elgon, Rwenzori, Moroto, Mufumbiro

A map of Uganda showing major mountains

Types of mountains

- Black mountains
- Volcanic mountain

Formation of mountains

Block/horst mountains

Block mountains were formed as a result of faulting. Mountain Rwenzori is an example of a block mountain. Compressional forces led to the formation of block mountains

Formation of block mountains

NB: faulting is the cracking of rocks in the earth's crust.

Mountain Rwenzori

It is the highest mountain in Uganda. Mountain Rwenzori is located in western Uganda and its highest peak is called Margherita. The Bukonjo and Bamba are the tribes that live on the slopes of mountain Rwenzori. Kasere and Bundibugyo are some of the districts that share mountain Rwenzori. Mountain Rwenzori is a source of rivers like River Mubuku, River Sebwe and River Nyamwamba. Coffee and banana are examples of crops commonly grown on the slopes of Mountain Rwenzori.

Mountain Rwenzori is snowcapped throughout the year because its peak crosses the snowline. HM Stanley called it the "mountains of the moon" because its peak looked like a rising moon.

Volcanic Mountains

These are mountains formed as a result of volcanicity. Volcanicity is the process by which magma is forced onto the earth's surface through a vent.

A volcano is a mountain with a vent through which magma is forced through the earth's crust and onto the earth's surface.

A diagram showing the formation of volcanic mountain.

Types of volcanoes

Active volcanoes

This is a volcano that has taken a long time without erupting but can erupt in the future.

Extinct volcanoes

These are volcanoes that cannot erupt

Importance of volcanicity

Volcanicity leads to formation of fertile volcanic soil which favours crop growing
Volcanic mountains attract tourists who bring in income.

Dangers of volcanicity

- i) It leads to death of people and animals
- ii) It leads to air pollution
- iii) It leads to destruction of property.

Other features formed as a result of volcanicity include, crater lakes, lava dammed lakes, hot springs etc.

Mountain Elgon

Mountain Elgon is located in Eastern Uganda. Its highest peak is called Wagagai and it was formed by volcanicity. The Bagisu and Sabiny live on the slopes of mountain Elgon. Mbale, Kapchorwa, Sironko and Manafwa are the districts that share this Mountain.

Crops commonly grown on the slopes of mountain elgon include Arabica coffee, wheat, bananas etc.

River Manafwa, River Mpologoma are some of the rivers that originate from mountain Elgon.

Factors that favour the growth of arabica coffee on the slopes of mountain elgon.

- Presence of volcanic fertile soils
- Presence of reliable rain fall
- Presence of cool temperature.

Mountain Mufumbiro

- Mountain Mufumbiro is located in south western Uganda
- It was formed by volcanicity
- Its highest peak is Muhavura
- Kisoro and Kanungu districts occupy mountain mufumbiro.
- The Bakiga and Bafumbira live on the slopes of Mountain Mufumbiro.
- Potatoes, sorghum are some of the common crops grown on the slopes of this mountain.

Mountain Moroto

- It is located on the North Eastern parts of Uganda
- Its highest peak is called Sokdek
- The Karimojong tribe mainly lives on the slopes of Mt. Moroto.
- Moroto district surrounds the mountain
- The main economic activity carried out by people who live on the slopes of mountain Moroto is pastoralism.

Activity

1. What term is used to mean landforms of an area that gives the earth shape?
2. List three examples of physical features
3. What are relief features?

4. Complete the table below.

Mountain	Highest peak	Formation
Elgon	_____	_____
Rwenzori	_____	_____
Moroto	_____	_____
Mufumbiro	_____	_____

5. Why was mountain Rwenzori named “mountains of the moon” by HM Stanley?
6. How is volcanicity important to farmers?
7. Why is it not advisable to settle on the slopes of active volcanic mountains?
8. Apart from volcanic mountain mention any two other features formed by volcanicity.
9. Which type of volcanoes lack the ability to erupt?
10. Use the diagram below to answer questions that follow.
 - a) Which process is taking place on the above diagram?
 - b) Name the physical features marked at T
 - c) Identify forces marked S
 - d) State one Physical feature formed by the above process
11. What name is given to a lake formed on top of the dead volcano?
12. Mention one condition that favours the growth of arabica coffee on the slopes of mountain Elgon
13. How is Mt. Rwenzori and Mt. Elgon politically important to Uganda

Importance of Mountains and Hills

- i) They help in rain formation i.e., relief rainfall
- ii) They have fertile soils which support crop growing
- iii) They attract tourists who bring in income
- iv) They are used by telecommunication companies to places on mast
- v) They are sources of minerals etc.

Formation of Relief Rainfall

The rift valley

A rift valley is a long and wide depression on the earth's surface.

Escarpment are steep sides/slopes of rift valley

Arms of the rift valley

Western rift valley

Eastern rift valley

Feature found in the rift valley

Lakes e.g., Albert, L. Edward

Rivers, hills

Rift valleys were formed by faulting

Formation of rift valley

Economic activities carried out in a rift valley

Crop cultivation, tourism, mining, animal rearing

Importance of the rift valley

- it has lakes which promotes fishing
- it promotes tourism
- it has pastures for animal rearing
- it acts as a natural boundary
- it is a source of minerals

Dangers of the rift valley

- i) it is affected by floods
- ii) it makes road and railway construction difficult
- iii) it experiences high temperatures

Plateaus and Plains

a plateau is a raised flat-topped piece of land

a plain is a large flat area.

Features found on a plateau include lakes, rivers, valleys, hills etc.

Economic activities carried out in plateau areas

Crop growing

Tourism

Fishing

Animal rearing

mining

Lumbering

Importance of plateaus

- They have fertile soils for crop growing
- They have plenty of pastures for animal rearing
- They promote tourism
- They help in formation of cyclonic rainfall

Why plateaus are good for settlement

- i) They have enough space for settlement
- ii) They have fertile soils for crop growing

iii) They have plenty of pastures for animal rearing

Formation of Cyclonic Rainfall

Activity

1. Which type of rainfall is commonly received in highland areas?
2. How are hills important to telecommunication companies?
3. Use the diagram below and answer the questions that follow.
 - a) Which physical feature is responsible for the above type of rainfall?
 - b) Name the side marked
N _____
T _____
 - c) Which process takes place at area X?
 - d) Give a reason why side T has no vegetation?
 - e) Apart from the above type of rainfall, mention two other types of rainfall.
4. Which kind of relief feature has escarpments?
5. Mention the arm of the rift valley that crosses Uganda.
6. How were rift valleys formed?
7. In which way are rift valleys politically important?
8. Why do rift valley areas have high temperatures?
9. Which force led to formation of rift valleys?
10. What is a plateau?
11. State two importance of plateaus.
12. Identify two economic activities carried out on a plateau.

DRAINAGE FEATURES

Drainage features are landforms with water e.g., lakes, rivers etc.

Lakes in Uganda

A lake is a depression on the earth's surface in which water collects

A MAP OF UGANDA SHOWING MAJOR LAKES

Types of lakes

Basin lakes	Man made lakes
Rift valley lakes	Lava dammed lakes
Crater lakes	

Basin lakes

Examples include; Lake Victoria, L. Kyoga, L. Kwana etc.

Characteristics of basin lakes

They are wide

They are shallow

They have fresh water

They have irregular shapes

Lake Victoria

- Its local name is L. Nalubaale. it was formed by down warping
- It is the largest fresh water lake on Uganda's central plateau
- John Speke was the first European explorer to see L. Victoria
- He named it Victoria after queen Victoria of England
- Kalangala and Buvuma are completely surrounded by L. Victoria

Inland ports on Lake Victoria (diagram)

- River Nile (Victoria Nile) flows out of L. Victoria
- R. Katonga and river Kagera flows into L. Victoria

Lake Kyoga

- Lake Kyoga is found on the central plateau. it is the swampiest lake in Uganda.
- It is swampy because it is shallow due to the silting of the Nile.
- Chaille long was the first European to see it
- Victoria Nile flows from Lake Victoria towards L. Kyoga which shows that L. Victoria is at higher altitude than L. Kyoga
- Port Lwampanga and Namasale are inland ports found on L. Kyoga
- Victoria Nile, R. Sezibwa and R. Kafu flow into L. Kyoga

NB: fresh water lakes have fresh water because they have inlets and outlets

Rift valley lakes

- Rift valley lakes were formed by faulting
- L. Albert and lake Edward are examples of rift valley lakes

Characteristics of rift valley lakes

- i) They are deep
- ii) They are oblong (long and narrow)
- iii) They have salty water

Most rift valley lakes have salty water because they have no outlets

Lake Albert

- Its local name is Mwitanzigye
- Sir Samuel Baker was the first European explorer to see L. Albert
- He named it Albert after Sir Albert who was the husband of Queen Victoria of England.
- Crude oil was discovered at the shores of L. Albert
- Port Butiaba, Wanseko and Ntoroko are some of the inland ports found on Lake Albert.
- River Semliki and Victoria Nile flow into L. Albert while Albert Nile flows out of L. Albert

Lake Edward

- It is found on the border of Uganda and DRC
- HM Stanley was the first European explorer to see Lake Edward.

- It is connected to lake George by kazinga channel.
- Kazinga channel has the biggest number of hippos in Uganda.
- Kazinga channel is found in (located) in queen Elizabeth national park.

Crater lakes

- Crater lakes are formed on top of volcanic mountains
- They are formed as a result of volcanicity
- L.katwe, Elgon crater and L. Nyamunuka are examples of crater lakes

Lava dammed lakes

- They are formed when lava flows and blocks a flowing river (volcanicity)the water collects behind to form a lake.
- Lake Bunyonyi (deepest) and L. Mutanda are examples of lava dammed lakes.

Mam made lakes

- They are formed as a result of man's activities
- They are formed when man constructs a dam along rivers
- They can also be formed as a result of digging valley dams
- Kabaka's lake is an example of such a lake.

Ox-bow Lake

- These are formed as a result of river deposition
- They are mainly formed on meandering rivers in the lower stages of a river.

Importance of lakes

- They help in rain formation
- They are fishing grounds
- They are used for transport
- They are sources of minerals
- They attract tourists who bring in income
- They act as natural boundaries

Rivers in Uganda

- A river is a mass of flowing water in a channel on the earth's surface
- Rivers in Uganda include;
 - River Kafu
 - River Kagera
 - River Achwa
 - River Nile
 - River Katonga
 - River Semliki etc.

A MAP OF UGANDA SHOWING MAJOR RIVERS

Types of rivers

- Permanent Rivers:** These are rivers which flow throughout the year e.g., R. Nile, R. Kafu etc.
- Seasonal Rivers:** These are rivers that only flow during the wet season e.g., R. Agagu

Terms related to rivers

A river source is a point where a river begins to flow.

A river mouth: is a point where a river ends its flow.

A tributary: is a small river that join the main river

A distributary: is a small river that branches away from the main river.

A river confluence: is a place where two or more rivers meet to flow as one

A delta: is the place where a river forms several streams at the end.

Stages of a river and their characteristics

Stage	Characteristics
The upper course	• It has water falls • The river flows very fast
The middle stage	• The river flows gently • It forms meanders
The lower stage	• The river flows slowly • It forms deltas

River Nile

- Its local name is Kiira
- Its source is Lake Victoria and its mouth is Mediterranean Sea
- John Speke was the first European explore to see its source
- The countries it crosses are; Uganda, Egypt, South Sudan, Sudan, Ethiopia
- Karuma dam, Nalubaale dam are examples of dams found on R. Nile
- Water falls on river Nile include; itanda falls, Murchison falls and Karuma falls

NB: the Nile valley is the area drained by R. Nile, its distributaries and tributaries

Reasons why some rivers are not navigable

- Presence of waterfalls
- Presence of floating vegetation
- Presence of dams
- Some parts of R. Nile are narrow
- Some parts have dangerous water animals

A diagram showing a river system

Other rivers in Uganda

1. River katonga: it flows from lake George to L. Victoria
2. River kagera: it flows from Burundi highlands to L. Victoria.it forms a natural boundary between Uganda and Tanzania.
3. River Semliki:it is found on Uganda DRC border.it connects lake Edward to lake albert.
4. River Achwa: it joins river Nile near Nimule in South Sudan .it is the main tributary of river Nile in Uganda.
5. River kafu:it flows from lake albert to lake kyoga

Activities caried out on lakes and rivers

Tourism
Fishing
Mining etc.

Problems associated with lakes and rivers

Flooding
Drowning

They harbour dangerous water animals that can attack people

They harbour disease vectors

Problems facing lakes and rivers

Drought which reduces water levels

Overfishing

Dumping of waste into water bodies

Silting which reduces the depth of water bodies.

Reasons why shores of lakes and rivers are densely populated

- They receive reliable rainfall
- They have fertile soils for crop growing
- They have many job chances.

Formation of convectional rainfall. (diagram)

Influence of physical features on the climate

- Mountains help in formation of relief rainfall. areas at high altitudes like mountains are cool.
- Lakes and rivers help in formation of convectional rainfall
- Plateau and plain areas make formation of cyclonic rainfall possible.

Influence of physical features on animals.

- In plateaus or plains, the savannah grasslands and high temperatures provide good conditions for wild animals like elephants, zebras etc.
- Wetlands like lakes and rivers have animals that live in water such as crocodiles, fish etc.
- Wooded or forested mountains have animals such as mountain gorillas

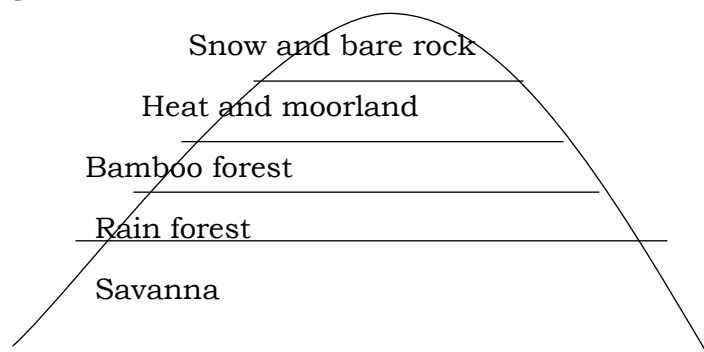

Influence of physical features on human activities

- Many people settle in highlands because they have fertile soils which favour crop growing. People settle near lakes and rivers to carryout fishing.
- People like settling in plains to presence of pasture and space for animal rearing.

Influence of physical features on vegetation

Mountains influence temperature. Temperature in turn affects the type of vegetation of a place. The low laying areas of mountains have savannah grassland.

Illustration of vegetation on a mountain

There is no vegetation on most mountains because the areas are too cold to support plant life
Areas around lakes have papyrus because the areas are water logged e.g., areas around L. Kyoga are swampy

Activity

1. Name the largest fresh water lake in Uganda
2. Compare L. Victoria and L. Albert in terms of their formation
3. State any two characteristics of basin lakes.
4. Why is Lake Victoria referred to as an inter-territorial lake?
5. Mention any two inland ports located on L. victoria
6. Why do basin lakes usually have fresh water?
7. Why does R. Nile flow from L. Victoria towards lake Kyoga.
8. Why is lake Kyoga very swampy?
9. Why are most rift valley lakes salty?
10. Name any two rift valley lakes in Uganda
11. State any two characteristics of rift valley lakes
12. How is sir Samuel baker related to lake albert?
13. Name the water channel that connects L. Edward to L. George
14. Mention the commonest animal species located at kazinga
15. Why is lake Katwe considered as a rift valley lake yet it is located within the rift valley?
16. Name the deepest lake in Uganda
17. How were the following lakes formed?
 - a) L.albert
 - b) L.kyoga
 - c) L.Katwe
18. Identify any one economic importance of water falls
19. Give the meaning of the following terms
 - a) Tributary
 - b) distributary

FISHING IN UGANDA

Fishing is the extraction of fish from water bodies

Fishing grounds include: lakes, rivers, streams

Fish species caught in Uganda include Nile perch, Tilapia, lung fish, mud fish etc.

NB: Nile perch is the largest fish caught in Uganda's water bodies

Tilapia is the commonest fish caught in Uganda's water bodies

Mud fish is commonly got from swamps.

Methods of catching fish

Modern methods of fishing

- Gillnet method
- Trawling
- Drifting
- Line fishing method

Traditional methods of fishing

- Using baskets
- Using hooks
- Using spears
- Using bows and arrows

Methods of preserving fish

Modern methods

- Refrigeration
- Canning

Local methods

- Smoking fish
- Sun drying
- Salting fish

Importance of fish

- It is a source of employment
- It is a source of food to people
- Fish is used as a raw material in fish processing industries
- Exported fish earns foreign exchange to the government.

Problems facing fishing industry

- Poor fishing methods
- Water pollution
- Presence of water hyacinth
- Poor storage facilities
- Presence of fish predators like crocodiles.

Possible solutions to the problems

- By protecting fishing grounds
- By enforcing laws against overfishing
- By teaching fishermen, the dangers of using poor fishing methods
- By encouraging foreign investors in Uganda

Dangers of water hyacinth

- It hinders water transport
- It breaks fishing nets
- It suffocates fish

Water hyacinth can be removed by:

- Spraying it with chemicals
- Using machines to remove it
- Using manual methods to remove it.
- Why is fishing called an industry?
- It is a source of government revenue
- It creates employment

Activity

1. Name the largest fish species caught in Uganda's water bodies.
2. Mention any two modern fishing methods
3. Give any two ways the fishing industry is important
4. State any two problems facing the fishing industry in Uganda

5. Give any two ways the water hyacinth affects the fishing industry in Uganda
6. State any two ways the fishing industry can be improved
7. Suggest two reasons why many people in Uganda use traditional methods of fishing
8. State one disadvantage of modern methods of fishing

CLIMATE OF UGANDA

Climate is the average weather condition of a place recorded for a long time

Climatology is the scientific study of climate

Climatologist is a scientist who studies climate

Meteorologist is the scientific study of weather

Weather forecasting is the foretelling of weather changes

Importance of weather forecasting

It helps farmers to plan for their farming activities

It helps pilots to know the right weather to fly the aeroplane

It helps the sailors to know the right weather to sail.

Weather

This is the state of the atmosphere of a place to a given time

Types of weather	Conditions of weather	Elements of weather
Rainy weather	Rainy	Rainfall
Windy weather	Windy	Wind
Cloudy weather	cloudy	Cloud
Sunny weather	Sunny	Sunshine
Fogg weather	Foggy	Fog
Humid weather	Humid	Humidity
Hot and cold weather	Hot and cold	Temperature
Misty weather	Misty	Mist

Temperature

Temperature is the degree of hotness or coldness of a place or an object

Degrees are units used to measure temperature

The instrument used to measure temperature is a thermometer.

Qn: find out types of thermometers, their diagrams and why mercury is used in the thermometers.

Clouds

Clouds are layers of grey or white-water vapour that floats in the atmosphere

Types of clouds include: nimbus clouds, stratus clouds, cumulus clouds

- Cumulus clouds looks like floating cotton
- Stratus clouds they are uniform, flat and produce a gray layer.
- Nimbus clouds- they are dark grey and thick enough to block out the sun. They result into rain.
- Cirrus clouds – they are feathery and hair -like in nature

Importance of clouds

- Clouds give us rainfall
- Clouds protect us from too much sunshine(heat)
- They help us to forecast weather

Dangers of clouds

- They can lead to air transport accidents if pilots can't see clearly where they are going
- Nimbus clouds can cause too much rainfall which leads to floods.

Rainfall

Rain fall is the quantity of rain falling in a given area at a given time

Rainfall is measured in millimeters and the rain gauge is the instrument used to measure the amount of rainfall.

Types of rain fall include: cyclonic, convectional and relief rainfall.

The major processes involved in the rainfall cycle are evaporation, transpiration and condensation.

Importance of rainfall

Rainfall helps farmers crops to grow

it enables people to harvest water.

Rainfall helps reduce temperatures of an area.

Dangers/disadvantages of rainfall

- Too much rainfall causes floods
- Too much rainfall destroys people's property

Sunshine

These are rays of light from the sun

The sunshine recorder shows the number of hours the sun has been shining in a day.

Uses of sunshine

- It is used to dry clothes
- Sunshine is used to dry harvested crops
- Sunshine helps farmers' crops to grow
- Sunshine is a source of vitamin D

Dangers of sunshine

- Too much sunshine destroys farmers crops
- Too much sunshine can lead to heat. Rapid increase in the body's temperature. The body can't cool it down.

Wind

- Wind is air in motion
- The wind vane shows the direction of wind. Anemometer measures the speed of wind.
- Wind is measure in km/hr.

Uses of wind

- It is used in winnowing
- It is used to generate electricity
- It is used to fly kites
- some sailors use it to sail their boats

Dangers of wind

- Too much wind can destroy people's property.
- Wind can lead to easy spread of air borne diseases

Humidity

- Humidity is the amount of water vapour in the atmosphere

- The hygrometer is used to measure humidity

Air pressure

This is the force exerted on the earth's surface by weight of air.

Air pressure is measured by millibars. The barometer is used to measure air pressure.

Aneroid barometer and mercury barometer are the two main types of barometers

NB: picture /diagrams of the above weather instruments mentioned in different elements of weather and their uses.

A weather station

- Weather station is a place where weather elements are studied and recorded.
- Instruments found at a weather station include wind vane, anemometer, Stevenson screen etc.....

Stevenson screen

- A Stevenson screen is an instrument that is used to keep delicate weather instruments.
- The Stevenson screen has the following features
- Louvers- to allow free air circulation
- It is painted white to reflect sun heat
- It is made of wood to prevent it from absorbing heat
- It is raised 1- 5meters above the ground to keep it free from splash water.

Instruments found/kept in a Stevenson screen

Barometer

Hygrometer

Six's thermometer

Apart from weather instruments, weather records are also kept in a Stevenson screen

(Drawing)

Seasons

These are changes in weather patterns due to the revolution of the sun

Wet season and dry season are the major seasons in Uganda

During the wet season a lot of rainfall is received while in the dry season little or no rain is received

Activities done in the dry season

Harvesting

Preparing the land

Irrigation

Activities done in the wet season

Planting

Weeding

Afforestation, Agro – forestry and re afforestation helps to reduce the effects of drought

Examples of weather disasters

Weather disasters are severe weather events that cause a lot of damage. These include

- Floods
- Drought
- Hailstorms

CLIMATIC REGIONS

The major aspects of climate are:

- i) Rainfall
- ii) Temperature

Examples of climatic regions / zones in Uganda

- Equatorial climate
- Tropical climate
- Semi – arid climate
- Mountain climate

A SKETCH MAP SHOWING THE CLIMATIC REGIONS IN UGANDA

Equatorial climate

It is described as a hot and wet throughout the year. It is experienced along the equator

Characteristics of equatorial climate

- It mainly receives convectional rainfall
- It has no dry month
- It has a double maxima (2 seasons of heavy rainfall)
- Rainfall is accompanied by lightning and thunderstorms
- Shores of L. Victoria experience equatorial climate.
- Districts include Wakiso, Jinja, Mukono, Kalangala, Mpigi etc.

A climatic table showing equatorial climate

Months	J	F	M	A	M	J	J	A	S	O	N	D
Temp ^o c	23	25	27	26	24	22	21	25	29	26	25	23
Rainfall (mm)	70	190	300	250	170	150	50	120	180	270	150	120

Economic activities carried out in equatorial climate

- Crop growing (oil palm, bananas, coffee, cocoa, rubber)
- Lumbering
- Tourism

Activity

1. Give the meaning of each of the following
 - i) Climate
 - ii) Weather
2. Mention any two elements of weather
3. Match the weather instruments in list A to their uses in list B correctly

List A

Wind vane
Rain gauge
Hygrometer
Anemometer

List B

Measures humidity
Measures the speed of wind
Shows the direction of wind
Measures the amount of rainfall

4. When Joan went to weather station, she saw an arrow of a windvane pointing to the south. from which direction was wind blowing?
5. Mention any four any four types of climates experienced in Uganda
6. Which aspect of climate mainly influences human settlement?
7. How is equatorial climate described?
8. In which way can the following weather elements be dangerous
 - i) Too much sunshine
 - ii) Too much rainfall
9. Name the units used to measure the following weather elements
 - a. Rainfall
 - b. Humidity
10. Why is the rain gauge placed in an open flat area?

Tropical climate

Tropical climate is described as wet and dry

It is experienced in most parts of Uganda (because Uganda is found in the tropics)

Districts like Sembabule, Mubende, Mbarara, Luwero etc. experience tropical climate

Characteristics of tropical climate

- It has two wet seasons and two dry seasons
- Rainfall decreases as one moves far from the equator
- Rainfall is received when the sun is overhead the equator.

The climatic table of tropical climate

Months	J	F	M	A	M	J	J	A	S	O	N	D
Temp.(Oc)	20	23	26	24	22	18	19	23	27	24	23	21
Rainfall (mm)	50	110	200	140	50	25	25	75	150	157	60	40

Economic activities carried out

- Crop growing (maize, beans, sorghum, simsim, fruits, cotton, ground nuts)
- Bee keeping
- Tourism
- Lumbering

Semi-arid climate

- It is described as hot and dry
- It is experienced in northern parts of Uganda (Moroto, Kotido etc.)

Characteristics of semi-arid climate.

- There is low humidity
- It receives low rainfall.
- It has very hot days and cold nights

Economic activities carried out

- Tourism
- Pastoralism

Climatic table showing semi-desert climate

Months	J	F	M	A	M	J	J	A	S	O	N	D
Temp.(Oc)	23	24	21	24	31	33	34	32	32	29	27	25

Rainfall (mm)	50	40	28	-	-	-	30	75	120	100	-	20
----------------------	-----------	-----------	-----------	----------	----------	----------	-----------	-----------	------------	------------	----------	-----------

Problems faced by people who leave in semi-arid areas

- Shortage of water and pasture
- High temperature

Possible solutions to the above problems

- Constructing valley dams
- Introducing drought resistance pasture
- Encouraging people to harvest water on a large scale

Mountain climate

- Montane/mountain climate is experienced in highland areas
- Temperature reduces with increase in altitude
- Areas around Mt. Rwenzori, Mufumbiro and Elgon experience mountain climate. The districts include Kasese Bundibugyo, Mbale, Kisoro etc.

Characteristics of mountain climate

- It has cool temperature
- Relief rainfall is mostly received
- The windward side receives more rainfall than the lee ward side

Factors that influence climate

i) Altitude

Altitude is the height above sea level. Areas at a high altitude are cool while areas at a low altitude are hot.

ii) Vegetation

Areas with thick vegetation receive more rainfall than areas with scanty vegetation

iii) Human activities

In areas where people cut down trees, there is less rainfall compared to areas where people plant trees

iv) Latitude

Areas near the equator are hotter than areas far from the equator

v) Distance from the water body

Areas near water bodies receive more rainfall than areas far from water bodies.

NB: Research about human activities that affect climate positively and negatively.

Breezes

A breeze is the movement of air from a cool region to a warm region

Types of breezes

Sea breeze

Land breeze

i) Sea breeze

- This is the movement of cool air from the sea towards land
- It takes place during the day.
- During the day land is heated faster than water bodies

- The warm air on land rises and cold air from the sea moves towards land to replace it.
- ii) **Land breeze**
 - This is the movement of cold air from land towards the sea
 - It takes place during the night
 - At night the land cools faster than the sea
 - The warm air from the sea where pressure is low rises and the cooler air blows from land towards the sea to replace it.

Influence of climate on;

i) **Human activities**

Areas that receive reliable rainfall carry out crop growing in dry areas, people carry out pastoralism

ii) **Dressing**

In hot climate people wear light clothes. In cold areas people wear thick clothes.

iii) **Nature of building**

In areas with plenty of rainfall, people build houses with slanting roofs

iv) **Climate change**

This is the increase in the temperature of the world

Indicators of climate change

- High temperatures
- Increase in sea level
- Sea ice is melting faster

Causes of climate change

- Industrialization
- Deforestation
- Consuming too much

Effects of climate change

- Changing weather patterns
- High temperature
- Severe storms
- Increased drought

FARMING IN UGANDA

Farming is the growing of crops and rearing of animals

Arable farming and livestock farming are the types of farming

System of farming

Subsistence farming

This is the growing of crops and rearing of animals mainly for home use and surplus is sold.

Qn: Why do most people in Uganda carry out subsistence farming

Advantages of subsistence farming

- It does not require a large piece of land.
- It requires simple tools
- It requires less labour force.

Disadvantages of subsistence farming

- A farmer earns less income
- It leads to low yields

iii) It does not encourage economic development.

Mixed farming

This is the growing of crops and rearing of animals on the same piece of land

Advantages of mixed farming.

- i) A farmer gets double income
- ii) A farmer gets a balanced diet
- iii) Animals can easily depend on crops for food while the animals can provide manure to crops.

Disadvantages of mixed farming

- i) It requires skilled labour
- ii) It requires a large piece of land
- iii) Animals can destroy crops.

Plantation farming

This is the growing of one perennial crop on large scale for sale

Advantages of plantation farming

- It is a source of employment
- It is a source of raw materials for industries
- Government gets tax from plantation farms

Disadvantages of plantation farming

- It requires a large piece of land
- Pests and diseases can easily spread from one crop to another
- It is expensive to carryout

Examples of perennial crops

- | | |
|-------------|------------|
| - Tea | - Oil palm |
| - Sugarcane | - Cocoa |
| - Coffee | - Cloves |

Crop	Product
Sugarcane	Sugar
Coffee	Beverage, gun powder
Tea	Beverage
Cloves	Perfume
Oil palm	Cooking oil, soap
Cocoa	Cocoa drink

Types of crops

- Traditional cash crops
- Non. Traditional cash crops

Traditional cash crops

These are cash crops that were introduced for sale e.g., coffee, cotton, tobacco, coffee

Why people are encouraged to grow cash crops.

- To promote export trade

- To get raw materials for industries

Question

Which products are got from the following crops

- | | |
|-------------|----------|
| - Pyrethrum | - Rubber |
| - Cotton | - Maize |
| - Sisal | |

Non-traditional cash crops

These are crops which are grown for food but can be sold e.g., beans, maize, yams, Bananas, ground nuts etc.

Why the government is encouraging people to grow more non-traditional cash crops

- To promote food security
- To increase on people's income

NB: Make research about perennial crops.

Livestock farming (rearing of animals)

Ranching

This is the rearing of cattle on large scale for beef production.

Examples of ranches

- Kisozi ranch farm
- Singo ranch farm
- Zziwa ranch etc.

Products on a ranch

- Beef
- Hooves
- Horn tips

Dairy farming

This is the rearing of cattle on a large scale for milk production

Products on a dairy farm

- Milk (cheese, ice cream, ghee, yogurt etc.)
- Hides
- Hooves

NB: Research about dairy farms in Uganda (Muyomba dairy farm, kyome dairy farm)

Nomadic pastoralism

- This is the movement of people with their animals from one place to another looking for water and pasture.
- Karimojongs and Bahima are examples of pastoral tribes

Reasons why pastoralists move from one place to another

- To look for pasture for their animals
- To look for water for their animals
- To break the life cycle of disease vectors

Problems faced by pastoralists in Uganda

- Cattle rustling
- Shortage of water and pasture for animals
- Animal diseases

Possible solutions

- Disarming cattle rustlers
- Constructing valley dams
- Improving on veterinary services

Irrigation farming

Irrigation is the artificial supply of water on land to support plant growth

Irrigation farming is the system of crop growing in which land is supplied with water to support plant growth.

Examples of irrigation schemes in Uganda

Doho irrigation scheme (rice)

Tilda (Kabimba) irrigation scheme

Mubuku irrigation scheme (maize, rice etc.)

Nsimbe irrigation scheme(flowers)

Advantages of irrigation farming

- Crops are grown any time of the year.
- It promotes food security
- Idle land can be put into use

Disadvantages of irrigation farming

- It is very expensive to practice
- It can't be used in areas without a reliable water source
- It can lead to leaching

Activity

1. State the major economic activity carried out by most people in northern Uganda
2. Mention two factors that influence the climate of Uganda
3. How does altitude influence climate?
4. Mention any two human activities that negatively affect the climate of an area.
5. How can crop growing be made possible in dry areas?
6. Mention any two economic activities that are commonly carried out in montane climatic region
7. How does climate affect the way people dress?
8. How are donkeys useful to people of Kapchorwa district/
9. Why do most farmers in Uganda practice subsistence farming? (Give two reasons)
10. Name the major cash crop grown in west Nile
11. Name the crop used to make insecticides
12. What is irrigation scheme?
13. Which crops are mainly grown on the following irrigation scheme
 - i) Doho irrigation scheme
 - ii) Tilda irrigation scheme
14. State any two advantages of irrigation farming
15. How are valley dams important to people of north eastern Uganda?

16. Mention two problems faced by pastoral tribes in Uganda
17. Suggest one solution to the above problems

VEGETATION OF UGANDA

Concept of vegetation

Vegetation is the plant cover of an area, forests, crops, grassland are examples of vegetation

Types of vegetation

- i) Natural vegetation: -plant cover that grows on its own e.g., natural forests grassland etc.
- ii) Planted vegetation: -this is plant cover of an area planted by man e.g., Planted forests, crops etc.

Forests

A forest is a group of trees growing together on the same piece of land

ASKETCH MAP OF UGANDA SHOWING NATURAL AND PLANTED FORESTS

Types of forests

- i) Natural forests (group of trees in an area that grow on their own)
- ii) Planted forests (groups of trees grown by people)

Natural forests

Examples of natural forests

- Mabira forest
- Budongo forest
- Bugoma forest

Characteristics of natural forests

- Trees are evergreen
- Trees have broad leaves
- Trees have hard wood
- Trees take a long time to mature
- Tree species in natural forest include: Mvule, Rose wood Mahogany etc.

Economic activities carried out in natural forests

- Lumbering
- Charcoal burning
- Tourism
- Herbal medicine collection
- Planted forests

Characteristics of planted forests

- Trees produce soft wood
- Trees are planted in rows
- Trees are well spaced
- Trees are of the same species

Examples of tree species in planted forests

Pine

Fir

Cypress

Cedar

Spruce

Examples of planted forests

- Lendu forests
- Nyabeya forest
- Mafuga forest
- Itwara forest

Products got from soft wood

- Papers
- Pencils
- Match sticks
- Match boxes etc.

Importance of forests

- Forests help in rain formation
- They are a source of herbal medicines
- They promote tourism
- They act as habitat for animals

Dangers of forests

- They are habitat to disease vectors
- They harbour animals

Problems facing forests

- Deforestation
- Outbreak of bush fires
- Human encroachment on forestation

Deforestation

Deforestation is the massive cutting down of trees in an area.

Reasons for deforestation

- To get land for farming
- To get land for settlement
- To get land for building industries
- To get timber etc.

Dangers of deforestation

- It leads to soil erosion
- It leads to drought
- It destroys habitat for wild animals
- It leads to extinction of some trees

Ways of conserving forest

- By practicing afforestation
- By practicing re afforestation
- Through Agro forestry

NB: NFA is the body responsible for conserving natural forests

ROLES OF NFA

- It teaches people about the importance of forests
- It creates forest reserves
- It enforces laws against deforestation

Activity

1. Give the meaning of the term vegetation
2. Give any one example of each of the following types of vegetation
 - i) Natural vegetation

ii) Planted vegetation

3. State any two characteristics of natural forests
4. Mention any two tree species that are common in planted forests
5. Which type of wood is got from planted forests
6. Give one reason why people plant flowers in their compounds
7. Name the largest natural forest in Uganda
8. Which natural forest is found along Kampala - Jinja highway?
9. Name any two tree species common in natural forests
10. Write NFA in full
11. How does NFA conserve forests in Uganda
12. State any two problems facing forests
13. How can forests be of danger to people
14. How do herbalists benefit from natural forests?

Vegetation zones

A vegetation zone is an area under the same kind of plant cover.

Examples of vegetation cover

Equatorial rainforests/tropical rainforests

Savannah vegetation

Semi - desert vegetation

Mountain vegetation

A MAP SHOWING VEGETATION ZONES IN UGANDA

Key

Equatorial vegetation

- Equatorial forests are described as evergreen
- Equatorial forests are at times called tropical rainforests because they grow in areas that receive plenty of rain fall.
- This type of vegetation is mainly found in areas around Lake Victoria and south western Uganda

NB: Characteristics of equatorial rainforests are the same characteristics of natural forests

Economic activities commonly done in equatorial forests

- Lumbering
- Charcoal burning
- Tourism etc.

Animals that are commonly found in this type of vegetation are mountain gorillas, monkeys

Semi - desert vegetation

- Semi - desert vegetation is mainly found in north eastern Uganda (kotido, Moroto, kaabong)
- Semi desert vegetation has few trees because it receives very little rainfall.
- Trees in semi – desert vegetation have thick barks and thin leaves to reduce the rate of transpiration.

Characteristics of semi desert vegetation

- Trees are scattered
- Trees have thick barks
- Trees have long roots to tap underground water
- It has very short grass
- Common plants in semi - desert vegetation include cactus, baobab, Acacia
- Pastoralism (cattle keeping) is the major economic activity

Mountain vegetation/montane vegetation

- It is found in mountainous areas
- Vegetation changes with increase in altitude
- Montane vegetation is mainly found on the slopes of mountain Rwenzori and Elgon

Factors that cause vegetation variation in mountainous areas

- Altitude
- Temperature
- Rainfall distribution

Characteristics of mountain vegetation

- Trees are ever green
- Trees grow tall and straight
- The foothills have savannah grasslands
- Montane tops have few plants due to low temperature

Economic activities commonly carried out in montane vegetation

- Lumbering
- Tourism
- Fruit gathering

Savannah vegetation

- Savannah vegetation is found in tropical climate
- Savannah vegetation covers the largest part of Uganda
- Savannah vegetation has all grass and scattered (many) trees

NB: Find out how vegetation influences animals

Characteristics of savannah vegetation

- It has tall grass
- It has scattered trees
- Trees usually shed their leaves during the dry season

NB: Deciduous trees are trees that shed their leaves during the dry season. tree species include Baobab, Acacia

- Districts with savannah vegetation include: -Mubende, Luweero, Guru etc.

Economic activities commonly done in savannah vegetation

- Tourism
- Bee keeping
- Cattle keeping

Activity

1. Mention any three vegetation zones found in Uganda
2. What are deciduous trees?
3. Name two districts in Uganda that have a semi desert vegetation
4. Which part of natural vegetation covers the largest part of Uganda?
5. How is deforestation dangerous to the environment
6. List two characteristics of semi desert vegetation
7. Why is there no vegetation on top of some very high mountains?
8. Identify two causes of changes in vegetation on a mountain

National parks in Uganda

A national park is an area set aside by the government to conserve wild life and hunting is not allowed.

Examples of national parks

- Marchion falls national park
- Lake Mburo national park
- Queen Elizabeth national park
- Rwenzori mountain national park
- Kidepo valley national park etc.

A National reserve is an area set aside by the government to conserve wild life and hunting is allowed after getting permission

Examples of national reserves

- Kigezi national reserve
- Karuma national reserve
- Bokura national reserve

Major national parks and reserves in Uganda (map)

Activities that commonly take place in national parks

- Animal tracking
- Game drives
- Natural walk
- Mountain climbing etc.

Prohibited /unauthorized activities in national parks

Crop growing

Hunting

Human settlement

Major tourist attractions in selected National Parks

National Park 1	Major tourist attraction
Marchion falls	Crocodiles
Kidepo valley	Ostriches
Queen Elizabeth	Hippos
Lake Mburo	Zebra
Bwindi / Mgahinga	Mountain gorillas

Importance of national parks

They create job chances

They attract tourists who bring in income

They promote research

They lead to development of infrastructures e.g. hotels, roads etc.

Problems facing national parks

Poaching

Bush fires

Animal diseases

Human encroachment in national parks

Poaching is the illegal hunting of animals in national parks

Why do people carry out poaching?

- To get meat
- To get horns and ivory
- To get hides and skins

Possible solutions to problems facing national parks

- Improving on security in national parks
- Improving on veterinary services
- Sensitizing people about the importance of wild animals
- Enforcing laws against poaching

Tourism industry in Uganda

- Tourism is the business of providing services to a tourist
- A tourist is a person who travels to places for study or for pleasure
- Tourism is called an industry because it generates income and it creates employment
- Tourism is called an invisible trade because it generates income without exchanging physical goods.

NB: Find out about the types of tourists

Major tourist attractions

- Wild life
- Physical sites
- Climate
- Vegetation
- Historical sites

Importance of tourism industry

- It creates job chances
- It is a source of government revenue
- It promotes conservation of wild life
- It creates market for locally manufactured goods
- It promotes international relationship

Problems facing the tourism industry

- Poor transport network
- Poor accommodation
- Political instability
- Shortage of funds to support the tourism industry

Possible solutions to the above problems

- Improving security in all parts of Uganda
- Enforcing strict laws against poaching
- Constructing better roads in all parts of Uganda
- Advertising Uganda's tourist attractions

Dangers of tourism

- Some tourists come as spies
- Tourism can bring about spread of diseases in the country

Swamps

- A swamp is a water-logged area with vegetation
- Wetlands are water logged areas
- Lubigi swamp is one of the examples of swamps in Uganda

Crops commonly grown in swamps

- Rice
- Yams
- Sugarcanes

Importance of Swamps

- They are a source of swamps
- They are fishing grounds
- They are sources of minerals e. g sand
- They help in rain formation
- They are habitat to some animals e.g., frogs, hippos
- They are sources of raw materials e.g., frogs, hippos
- They are sources of raw materials for craft industry e.g., papyrus reeds

Ways people misuse swamps

- By dumping industrial waste in swamps
- Uncontrolled harvesting of papyrus reeds
- By burning swamp vegetation

Swamp drainage is the removal of water from swamps

Swamp reclamation is the act of changing a swamp from its natural state for other uses.

Why people drain swamps

- To get land for crop growing
- To get land for constructing industries and roads.

Qn: How do people drain swamps?

Problems faced by people who live near swamps

- Floods during the rainy season
- Attacks from dangerous animals
- Attacks from disease vectors

Qn: How does swamp drainage affect the following

- i) Climate
- ii) Environment

The body responsible for conservation of swamps is NEMA

DUTIES OF NEMA

- It teaches people about the importance of swamps
- It evicts people who settle in swamps
- It creates forest reserves

Activity

1. Why are most national parks in Uganda located in savannah grasslands?
2. Give any two reasons why people drain swamps
3. Identify one problem a person who lives near a swamp is likely to face.
4. What is a national park?
5. Name the largest national park in Uganda
6. Which national park would you advise a foreign tourist who wants to see mountain gorillas to visit?

7. Give any two ways national parks promote the development of the country
8. Identify any two man's activities that are prohibited in a national park.
9. List down two problems facing national parks in Uganda.
10. Identify any one solution to the above problems.
11. Why is tourism called an industry?
12. Mention two tourist attractions in Uganda
13. How do hotels promote tourism in a country?
14. How is poaching a threat to the tourism industry?
15. Give any two ways the tourism industry in Uganda can be improved.
16. Find out the importance of vegetation.

Ways people affect vegetation

Activities that affect vegetation

- Bush burning
- Deforestation
- Swamp drainage
- Overgrazing
- Overcultivation

Human activities that destroy vegetation

- Lumbering
- Charcoal burning
- Brick making

Ways of conserving vegetation

- By afforestation
- By re afforestation
- By agro forestry
- Through rural electrification etc.

Ways of caring for vegetation

- By watering plants
- By weeding
- By adding manure to the soil
- By thinning vegetation

Vegetation distribution in Uganda

Vegetation distribution is the way plant cover is spread in an area.

Factors that influence vegetation distribution

Climate

Areas that are dry have scanty vegetation areas that receive reliable rainfall have thick vegetation

Nature of soil

Areas with fertile soils have thick vegetation.

Areas with infertile soils have scanty vegetation

Human activities

Some human activities promote the growth of vegetation while others lead to destruction of vegetation

Altitude

Areas of low altitude have more vegetation than areas at a high altitude

Influence of vegetation on climate

Vegetation leads to the formation of convectional rainfall.

Influence of vegetation on population distribution

- i) Areas in savannah have many people because of the presence of pasture and enough space
- ii) Equatorial vegetation has very few people because of fear for disease vectors and wild animals
- iii) Semi-arid areas have few people because of vegetation which doesn't favour people and their animals
- iv) Mountain vegetation has many people because of the fertility of soil

Activity

1. How does charcoal burning affect vegetation?
2. Apart from charcoal burning, state two other human activities that destroy vegetation
3. Identify two ways of conserving vegetation
4. How does afforestation modify climate?
5. State two factors that influence vegetation distribution
6. How do the following influence vegetation distribution?
 - i) Climate
 - ii) Nature of soil
7. State any two results of deforestation
8. Give any one reason why areas in savannah are densely populated?
9. Why are equatorial forests sparsely populated? (Give two reasons)
10. Mention two ways of caring for plants

TOPIC :5: NATURAL RESOURCES IN UGANDA

Concept of resources

A resource is the component of the environment that people use to meet their needs

Examples of resources

Land

Water

Minerals

People cars buildings etc.

Types of resources

- i) Natural resources (things in the environment that people use to meet their needs that exist on their own)
- ii) Man-made resources (things in the environment that people use to meet their needs that are made by people.)

Types of natural resources

- i) Renewable resources: - things which are used to satisfy man's needs in the environment that cannot be used up e.g. land, water, wind, people, water, animals etc.
- ii) Non-renewable resources: - things which are used to satisfy man's needs in the environment that can be used up e.g. minerals

Land as a resource

Land is the earth's surface that is not covered by water

Land is called the most important resource because most of man's activities take place on land and most resources are found on land.

Uses of land

- Land is used for crop growing

- Land is used for grazing animals
- Land is used for settlement
- Land is sold to get money
- Land is used as a mining ground.

Land degradation

Land degradation is the lowering of quality of land and its productivity

Ways people misuse(degrade) land

- Through deforestation
- Through dumping waste on land
- Through overgrazing
- Through bush burning
- Through brick making

Ways of conserving land

- Through afforestation
- Through contour ploughing
- Through agro forestry
- By terracing

NB: Resources found on land include: -minerals, people, animals etc.

Minerals as a resource

Mining is the extraction of minerals from the ground. A Mineral is a valuable substance found on or below the ground.

A mineral deposit is a place where a particular mineral exists in large amounts

Types of minerals

Metallic minerals e.g. copper, zinc, lead etc.

Nonmetallic minerals e.g. lime stone, phosphate, fuel minerals e.g. crude oil, coal etc.

Methods of mining

- Open cast mining e.g. salt, soda ash, limestone,
- Underground mining, copper
- Drilling method e.g. crude oil
- Quarrying method e.g. stones, sand

A SKETCH MAP OF UGANDA SHOWING LOCATION OF MAJOR MINERALS

- CCC- crude oil
- PPP – copper
- LLL – limestone
- XXX – phosphates
- GGG – gold
- IR-IR – iron ore

Importance of the mining industry

- It is a source of job chances
- It is a source of foreign exchange to the government
- It is a source of raw materials for industries
- It leads o development of infrastructures

Importance of some particular minerals

Mineral	Importance	Area
Copper	For making electric wires, copper coins, bullets	Kirembe in Kasese
Diamonds	For making jewelry, equipment used for making glasses	Hoima, Kamwenge
Gold	For making jewelry, trophies, medals	Kotido, Mubende
Lime stone	For making cement, lime	Hima in kasese, osukuru hills in Tororo
Salt	For preserving food	L.Katwe
Crude oil	For making fuels e.g. petrol, diesel, paraffin	Albertine region
Phosphates	For making artificial fertilizers	In Tororo
Graphite	For making pencils,	Kitgum

Pupils identify things class made of different minerals

Reasons why mining industry is not well developed in Uganda

- Shortage of capital
- Shortage of skilled labour
- Low levels of technology
- Poor transport network in different parts of Uganda

Dangers caused by mining

- It leads to pollution
- It leads to displacement of people
- It leads to devegetation
- It promotes soil erosion

Problems faced by the mining industry

- Collapsing of mines
- Flooding of mines
- Unreliable mines
- Unreliable power supply
- Mining is the ministry of energy and mineral development

Wildlife as a resource

Wild life are animals, plants, insects and birds that live in their natural habitat

Herbivores are animals that feed on only vegetation e.g. zebra

Carnivores are animals that feed on only flesh e.g. lion

Omnivores are animals that feed on both vegetation and flesh e.g. Pigs

Animal resources

Types of animals

- Domestic animals
- Wild animals
- Needs of animals
- Food
- Water
- Shelter
- Medical care

Importance of wildlife

- They attract tourists
- They are used for research
- They are sources of employment

Dangers of animals

- They destroy farmers crops
- Wild animals can attack people
- Some animals spread diseases to man

How people mistreat animals

- By denying them food
- Through poaching
- By overloading pack animals
- Through bestiality

Man as a resource (human resource)

Human resources refers to people who are useful to others.

Types of human labour

Skilled labour: -this refers to trained workers who provide labour to others

Unskilled labour: -this refers to untrained workers who provide labour to other people

Importance of people as a resource

- People provide labour on farms
- People help in management of other resources
- People provide services to other people e.g. teachers
- People pay taxes to the government

Ways of improving human resource

- By providing training to workers
- By providing better health services to people

Problems faced by human resource

- Low pay
- Accidents
- Diseases
- Bad weather
- Poverty

Ways how people misuse resources

- Through over fishing and over grazing
- Through swamp drainage
- Through bush burning
- Through dumping wastes in water bodies

NB: Research about time as a resource

Ways of protecting natural resources

- By encouraging people to plant more trees
- By teaching farmers better farming methods
- By teaching people, the dangers of misusing the environment

Activity

1. Give the meaning of the term resource.
2. Mention the two types of natural resources
3. Why is land regarded as the most important resource?
4. Mention any two examples of man-made resources in the environment

5. Identify one-way people misuse land
6. Which type of electricity is generated from fast flowing water?
7. Mention any two types of minerals
8. Mention any two methods of mining used in Uganda
9. Which major minerals is mined from Osukuru hills in Tororo districts?
10. Name the mineral that is used to make artificial fertilizers
11. Identify any one-way Uganda will benefit from extraction of crude oil.
12. State any two problems facing the mining industry
13. Give any two ways mining has promoted development in Uganda
14. Identify any two economic values of keeping animals.
15. Give one way people can serve as a resource
16. List two problems facing human labour.
17. How can pupils manage their time at school?

TERM TWO

THE PEOPLE OF PRE- COLONIAL UGANDA

Origin of people in Uganda

Definition of terms

Pre-colonial is the period before the coming of colonialists

A family is a group of people related by blood, marriage or adoption

A clan is the group of people with the same ancestors.

Tribe is a group of people with the same origin and speak the same language

Lineage is a group of people under one fore father in a clan.

Culture is the way of life of people in a given society

An ethnic group is a group of people with the same language

Sources of history

History is the study of the past in relation to the present.

Sources of history

- Archaeology
- Linguistic

Oral tradition

Oral history refers to about the past that is passed on from one generation to another by the word of mouth e.g. legends, poems

Advantages of oral tradition

- It is cheap in terms of getting information
- It promotes respect to the elders
- It favours the illiterates and the blind.

Disadvantages of oral tradition

- Information can easily be changed
- Information can easily be lost in case the person with the information dies.
- Information depends on one's memory

Written history

This is the information about the past that is put into writing eg.text books, newspapers, magazines

Advantages of written history

- Information can be kept for future use.
- Information cannot easily be changed
- It gives the time when the event happened.

Disadvantages of written history

- It is expensive to record information
- It does not cater for the illiterates
- It takes a long-time to correct wrong information

Linguistics

This is the study of the language spoken by different people

Archaeology

This is the scientific study of remains of people of long ago.

Dr. Merrick Posnanski is the archeologist who made discoveries in the Chwezi empire at Bigobyamugenyi.

Stone age periods

Stone age was the time when man used stones to make his tools

Stone age periods

1. Old stone age period

it was the first stone age

Characteristics of man in the old stone age

- Man had a hairy body
- Man used to eat raw meat
- Man slept under big trees
- Man used simple tools made out of stones

NB: The discovery of fire marked the end of old stone age and marked the beginning of the middle stone age

2. Middle stone age

It is also called **Metholithic period**.

The discovery of fire marked the beginning of the middle stone age

Characteristics of man in the middle stone age

- Man started living in caves
- Man started eating roasted meat.
- Man tamed the first animals (a dog)

Early man discovered fire by rubbing a dry stick in a hole in a dry piece of wood.

Importance of a dog to early man

- It helped early man during hunting
- It protected early man
- It gave company to early man

Ways how fire helped man

- It provided light in caves
- It was used to roast meat
- It provided warmth to early man
- It was used to boil poison

Tools used by early man

- Bolas: It was used to trap fast running animals
- Hand axe: -it was used for skinning
- Spear and bow and arrow: it was used for hunting
- Cleaver: -it was used for chopping meat
- Bone needle: -it was use for stitching animal hides
- Club: - it was used for chopping trapped animals

Examples of early man's food include: -raw meat, wild honey, fruits, insects, fish etc.

How early man obtained food

- By hunting
- By fishing
- By gathering fruits

NB: -Talk about the iron age

Activity

1. What do we call the pre-colonial period in Uganda?
2. Identify any two sources of history
3. What is the most reliable source of history?
4. Why is the above source referred to as the most reliable?
5. Name at least two stages of stone age
6. Which important discovery marked the end of early stone age?
7. State any two characteristics of the old stone age period

8. Give two ways a dog was useful to early man
9. Which discovery marked the end of the stone age period?
10. State any two ways the discovery of iron melting helped to improve early man's life?
11. How were the tools below used by early man?
 - i) Bolas
 - ii) Hand axe
 - iii) Spear
12. state two ways early man obtained food
13. give two examples of stone age sites

stone age sites and historical site

stone age sites are places where the remains of early man were discovered.

Historical sites

Historical sites are places where important events took place long ago.

Historical sites in Uganda include: -Namugongo martyrs' shrine, Kasubi tombs

STONE AGE SITES IN UGANDA

Importance of stone age sites

- They attract tourists who bring in income
- They are sources of employment
- They are used for research

Ethnic groups

An ethnic group is a group of people who have the same origin and almost speak the same language

Characteristics of ethnic groups

- They have the same cultures
- They speak a related language
- They have the same occupation

Examples of ethnic groups

- Bantu
- Nilohamites
- Nilotics
- Hamites
- Sudanic people

A MAP OF UGANDA SHOWING MIGRATION ROUTES OF ETHNIC GROUPS

Bantu ethnic group

- The bantu was he first group to come to Uganda.
- They originated from the Cameroon highlands and settled in the interlacustrine region.
- They speak a related language with a common suffix "ntu" when referring to people or things
- The Bantu were mainly crop farmers

Interlacustrine region

These are the regions of the great lakes of east Africa.

Why did the Bantu settle in the interlacustrine region?

- The area had fertile soils
- He area received reliable rainfall
- Lakes that makeup the interlacustrine region include: - L. Victoria, L. Kyoga, L. Albert etc.

- Legends under the Bantu ethnic group (narratives) lessons learnt

Reasons for the migration

- Civil wars in their homeland
- To look for areas with fertile soil
- To look for areas that receive reliable rainfall
- Epidemic diseases in their home land.

Effects of Bantu migration

- Bantu introduced new crops
- New culture were introduced
- They formed kingdoms
- Population increased in areas they settled

Qn: State Bantu tribes in Uganda

Nilotic (River – Lake Nilotes/Luo speakers)

- They migrated from Bahrel- **ghazal** in South Sudan and settled at **Pakwach**. They entered Uganda from the northern direction
- The legend of the spear and the beads and lessons learnt (narration) and their separation

Tribes under river- lake Nilotes

- Alur (west Nile)
- Acholi (North of Lake Kyoga) the largest tribe
- Jopadhola (Tororo)

Reasons for the migration of the Nilotics

- To look for areas with water and pasture for animals
- Outbreak of diseases in their homeland
- Prolonged drought
- Internal and external conflicts

Effects of the migration of the Nilotics

- They introduced the Luo language
- The number of domestic animals increased
- They introduced new culture they formed chiefdoms.

Nilo-Hamites

They originated from Ethiopia. Their main occupation is cattle keeping They are subdivided into plain Nilotes and highland Nilotes

Tribes under Plain Nilotes

- Karimojong
- Langi
- Iteso
- Jie
- Pokot
- Kumam

The Sabiny/Sebei tribe is the main tribe under highland Nilotes. They are called Highland Nilotes because they settle in Highland areas

The plain Nilotes are called so because they settle in plain areas

Reasons for the migration of Nile Hamites

- To look for pasture and water for their animals
- Outbreak of diseases in their home land.
- Prolonged drought

- Internal and external conflicts

Effects of their migration

- They introduced new culture
- They formed chiefdoms
- They introduced new language

Reasons why the plain Nilotes settled in plain areas

- The areas were free from disease vectors
- The areas were large enough without people
- Some plain Nilotes started mixed farming because they settled in areas with fertile soil. Some areas received reliable rainfall.

Hamites

Hamites form the smallest ethnic group in Uganda. They are mainly pastoralists. The Hamites migrated from Asia. They are believed to have entered Uganda from south western direction.

Tribes under Hamites

Bahima, Tutsi

Reasons for the migration of the Hamites

- Shortage of land in their cradle land
- They were looking for water and pasture for animals
- They were looking for areas which are free from diseases
- Internal conflicts

Effects of the migration of the Hamites

- It led to the introduction of new languages
- Population increased in the area where they settled.
- The number of domestic animals increased in Uganda

The Sudanic people

The Sudanic people migrated from juba and settled in west Nile. They are mainly cattle keepers

Sudanic tribes in Uganda

Madi

Lendu

Lugbara

Problems faced during migration

- Attacks from hostile people
- Attacks from tropical diseases
- Shortage of food and water
- Difficulty in crossing some physical features.

Activity

1. What is an ethnic group?
2. State two characteristics of ethnic groups
3. Which ethnic group is known for the following?
 - a. Suffix “ntu”
 - b. Settled near lakes and rivers
4. Mention two lakes found in the interlacustrine region
5. Complete the table below

Ethnic groups	Origin	Tribe	Direction of entry
_____	_____	_____	West
Nilotics	_____	_____	_____
_____	_____	Iteso	_____
_____	Asia	_____	_____

6. State two reasons for the migration of the Bantu
7. How did the migration of the Bantu to Uganda affect the bushmen?
8. Give any two reasons why some tribes under the Nile Hamites changed from cattle keeping to mixed farming?
9. Give any two effects of the migration of the Nilotics into Uganda
10. State any two problems faced by ethnic groups during migration
11. Where did the following ethnic groups settle when they entered Uganda
 - a. Nilotics
 - b. Bantu

MIGRATION TODAY

Migration is the movement of people from one place to another for settlement.

Types of Migration

Internal migration

External migration

Internal migration is the movement of people from one place to another within the country

Examples of internal migration

- Rural urban migration
- Urban rural
- Rural-rural
- Urban -urban

Rural- urban migration

This is the movement of people from villages to towns for settlement

Causes of Rural- urban migration

- To look for better social services
- To look for jobs
- To run away from harmful cultural practices

Effects of Rural- urban migration

- It leads to low food production
- It leads to depopulation in rural areas
- It leads to high crime rate in towns
- It leads to unemployment in urban areas.

Urban- rural migration

This is the movement of people from towns to villages for settlement

Causes of urban -rural migration

- High cost of living

- Retirement from jobs in towns
- Job transfers

Ways government can encourage urban- rural migration

- By extending electricity to rural areas (rural electrification)
- Providing better social services in villages
- By setting up small-scale industries in rural areas

Urban -urban migration

This is the movement of people from one town to another for settlement.

Reasons why people move from one town to another

- To look for better jobs
- To look for a large market for their goods
- To look for social services

Rural -rural migration

This is the movement of people from one village to another for settlement

Reasons why people move from one village to another

- To look for fertile soils for crop growing
- To look for areas with better social services

External migration

This is the movement of people from one country to another for settlement

Forms of external migration

- **Emigration:** -is the movement of people out of the country to another for settlement.
- **Immigration:** -is the movement of people into a country from another for settlement
- **An emigrant** is a person who leaves his/her own country and goes to live in another country permanently.

Causes of Emigration /Immigration

- civil wars
- search for jobs

Problems faced by people living in urban areas

- High crime rate
- High cost of living
- Traffic jam
- Unemployment among people

How do people in urban areas benefit from those living in rural areas?

- People in villages provide market for good produced by people in towns
- People in urban areas get food from people in rural areas
- Industries in town get raw materials from people in villages

Ways people in rural areas benefit from people in urban areas.

- People in towns provide market for food from people in villages
- People in towns provide produced goods to people in rural areas

Settlement patterns of the people of Uganda

- Linear settlement pattern
- Nucleated settlement pattern
- Dispersed settlement pattern

Political organization of the people of the pre-colonial Uganda

Political organization (unit)during pre-colonial Uganda

People were organized in

- Kingdoms

- Empires (an area ruled by an emperor is referred to as an empire)
- Chiefdoms (an area ruled by a Chief)

Bunyoro Kitara Empire

- This was the earliest kingdom to be formed. The founders of Bunyoro Kitara empire were the Batembuzi.
- It was founded by Ruhanga and his brother Nkya. The batembuzi formed the Tembuzi Dynasty
- The Batembuzi were believed to be demi gods because they could perform miracles
- Isaza was the last ruler of the batembuzi
- The batembuzi dynasty came to an end after king Isaza was locked underground by Nyamiyonga
- The batembuzi were succeeded by the Bachwezi

The Chwezi dynasty

- It was formed by the bachwezi
- Ndahura was the first king of the Bachwezi
- Wamala was the last of the Bachwezi

Contributions of the Bachwezi in Uganda

Political contributions

- They introduced the centralized system of governance
- They introduced that art of building reed places
- They introduced the royal regalia e.g., Royal drum royal spears

Social contribution

- They introduced local chess (Mweso games)
- They introduced the building of grass thatched houses
- They introduced the digging of ditches for protection against enemies

Economic contributions

- They started salt mining at l. Katwe
- They introduced the idea of iron and smelting
- They introduced long horned cattle
- They introduced bark cloth making

Reason for the collapse of the Chwezi dynasty

- The empire was too big to be ruled by one ruler
- Death of their beloved cow Bihogo
- Outbreak of famine and drought
- Outbreak of diseases

Activity

1. What is emigration?
2. Give any two reasons why many youths migrate from rural areas to towns today
3. How does migration affect the following places?
 - a) Rural areas
 - b) Urban areas
4. State any two steps the government of Uganda can take to encourage urban -rural migration
5. Give one way the people living in villages benefit from those who live in towns
6. State two ways the pre-colonial societies were politically organized
7. Why did the bachwezi dig ditches in Bunyoro Kitara?
8. Mention the earliest empire to be formed in Uganda

9. State any three social economic contributions of the bachwezi in Uganda.
10. Why were some tribes able to form kingdoms?
11. State any two reasons for emigration
12. List two reasons for urban rural migration
13. Mention two problems faced by people living in urban areas

Luo Babiito Dynasty

The Luo -Babiito dynasty replaced the Chwezi dynasty.

The Luo Babiito dynasty was founded by Isingoma Rukidi Mpuga

KINGDOMS

A kingdom is an area ruled by a king/queen

Characteristics of kingdoms

- They have hereditary rulers
- They have a single king at a time
- They have royal regalias
- Kings have absolute powers over their subjects

Advantages of kingdoms

- They promote unity
- They promote culture
- They promote morals
- They mobilise people for development

Disadvantages of kingdoms

- They promote dictatorship
- They promote interests of the minority over the majority
- There is equal distribution of wealth among people

Tribes that formed kingdoms include: -Baganda, Banyoro, Tooro etc. Tribes like the Karimojong, Acholi never formed kingdoms

Reasons why some tribes formed kingdoms

- They were united
- They were organized
- They lived a settled life

Reasons why some tribes never formed kingdoms

- They never lived a settled life
- They were not united

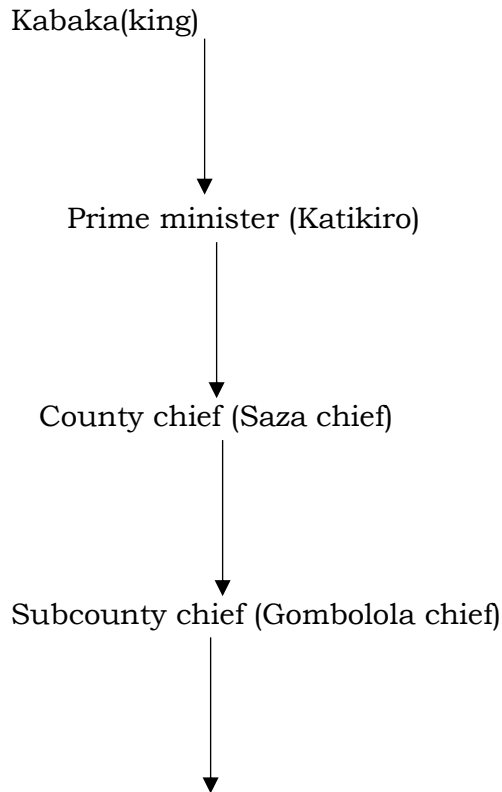

A SKETCH MAP SHOWING LOCATION OF KINGDOMS

After the collapse of Bunyoro Kitara Empire many kingdoms were formed e.g. Buganda, Bunyoro, Ankole etc.

Buganda kingdom

- According to the Baganda, kintu is believed to be the founder of Buganda kingdom and the first Muganda
- Narration of the legend of Kintu and Nambi (fist Muganda and lessons learnt)
- Buganda kingdom is located in the North West of L. Victoria and currently occupies districts like Kampala, Mukono, Mpigi etc.

The political (administrative) structures of Buganda kingdom

Sub parish (Mutongole chief)

Some prominate kings of Buganda

- Kabaka Suuna: -Welcomed the first Arab traders
- Kabaka Muteesa 1: -He invited Christian missionaries in Uganda
- Kabaka Mwanga: -He ordered for the killing of Christian converts
- Kabaka Muteesa 11: -He rejected the idea of the east African federation

Factors for the growth and expansion of Buganda kingdom

- Buganda had strong and able leaders
- Buganda had a strong army
- Unity among the people of Buganda
- Buganda was strategically located near L. Victoria

Roles of kings in Buganda kingdom

- Taking care of the kingdom property
- Leading people in war
- Settling disputes

BUNYORO KINGDOM

- Bunyoro kingdom started after the collapse of the Chwezi empire
- Bunyoro kingdom was founded by Isingoma Rukidi Mpuga
- The tittle given to the king of Bunyoro is Omukama
- The current king of Bunyoro kingdom is Solomon Gafabusa Iguru

Prominent kings of Bunyoro kingdom

- Omukama Kabalega
- Omukama Kamulasi
- Kabalega had a strong army called **Abarusura**

Duties of Abarusura

- To promote peace and security in Bunyoro kingdom
- To raid the neighbouring communities for expansion
- To enforce law and order

Factors that led to the expansion/growth of Bunyoro kingdom

- Bunyoro had able leaders
- Bunyoro had strong standing army
- Bunyoro was strategically located around L. Albert

Factors that led to the decline of Bunyoro kingdom

- Bunyoro kingdom was too big to be ruled by one person
- The rise of Banyoros neighbours e.g., Baganda internal conflicts
- The coming of the colonialists

Tooro kingdom

- The title given to the king of Tooro is Omukama
- Tooro broke away from Bunyoro kingdom
- The current king of Tooro is Oyo Nyimba Iguru iv
- Omukama Kasagama was one of the prominent kings of Tooro. He welcomed colonialists in Tooro kingdom-Prince Kaboyo was another prominent king of tooro

Reasons why Tooro broke away from

- The Batooro felt that they were not adequately protected by the king of Bunyoro.
- The Batooro felt that they were very far from the capital of Bunyoro since they would take long to see the king.
- Prince Kaboyo was very greedy and impatient for power since he had been appointed as a clan leader which had reduced his chances of becoming a king.

Ankole kingdom

- Ankole kingdom is believed to have been founded by Ruhinda the son of Wamala
- Ankole kingdom is located in the south western part of Uganda
- The title given to the king of Ankole is Omugabe

Famous kings of Ankole

- Omugabe Ntare
- Omugabe Kahaya

Decentralized societies in Uganda

Decentralized societies are societies that had no central rulers

These societies did not form kingdoms in Uganda

- Bakiga
- Bagisu
- Bamba
- Acholi
- Iteso
- Alur

Qn: Reasons why some tribes did not form kingdoms

Activity

1. why were some tribes in Uganda unable to form kingdoms?
2. Give two ways kingdoms are important in Uganda
3. Mention any two factors that led to the growth and expansion of Buganda kingdom
4. What name was given to the strong soldiers of Omukama kabalega
5. How did the Abarusura lead to the expansion of Bunyoro kingdom?
6. Which kingdom in Uganda is headed by Oyo Nyimba Kabamba Iguru
7. List two factors that led to the decline of Bunyoro kingdom
8. How are the following kings of Buganda famous?
 - a) Kabaka Ssuna
 - b) Muteesa I
 - c) Muteesa II
9. List any two famous kings of Bunyoro
10. How did the size of Bunyoro contribute to its collapse?

Social organization of ethnic groups

Social organization refers to people's way of life

People of long ago were organized socially in the following ways;

Clan

A clan is an organized group of people under one fore father

Duties of a clan leader

- To keep clan records
- To register clan members
- To settle disputes among clan members
- To chair clan meetings

Symbols of a clan

- Clan name
- A totem
- Clan head
- Clan drum sound

Taboos

A taboo is something forbidden in a given society.

Examples of taboos

- Not eating your totem
- Not sweeping at night
- Not sitting on fire stones

NB: Pupils give examples of taboos in their cultures

Importance of taboos

- They promote morals
- They promote unity among people
- They promote culture

Culture

Culture is the way of people in a given society

Types of culture

i) Material cultures

These are physical things shared used by people in some community e.g. clothes, food, drums and spears

ii) Non material culture

These are thoughts, beliefs and ideas shared by people in the same community e.g. dances, religions, languages, taboos

Non material culture doesn't involve physical objects

Ways of promoting culture

- By allowing children to attend cultural ceremonies
- Teaching children local languages
- By organizing culture wear
- Preserving cultural institutions

Values

Values are beliefs taken to be right and important in the society

Types of values

1. Personal values

These are beliefs taken to be right and important to a person e.g. Being obedient, respectful, patient etc.

2. Family values

These are beliefs taken to be right and important in the community e.g. cleanliness, honesty etc.

3. Community values

These are beliefs taken to be right and important in the community e.g. co-operation, helpfulness, being law abiding

Relationships

Relationships refer to the way people interact with one another.

Types of relationships

- Bloods relationship e.g., father, sister etc.
- Peer relationship classmates age groups etc.
- Marriage relationship e.g., wife, father-in-law etc.

Importance of relationships

- They promote unity
- They help in problem solving
- They promote peace and security

Dangers of some relationship

- Some relationships lead to early pregnancies
- Some relationships lead to immorality
- Some relationships lead to enmity among members of families

Economic organization of people of pre-colonial Uganda

Ways people of pre -colonial Uganda were economically organized

- Through iron smelting
- Through fishing, crop growing

- Through barter trade

Economic activities

These are types of work people do to earn a living

Examples of economic activities

- Crop growing
- Fishing
- Trade
- Pottery
- Salt mining

Trade

Trade is the buying and selling of goods of goods and services

System of trade

- Barter trade
- Monetary

Barter trade

Barter trade is the exchange of goods for goods or services

Items of trade that were exchanged during barter trade in Uganda

Salt, bark cloth, slaves, ivory, hide and skins, animals etc.

Advantages of barter trade

- It creates friendship among people
- It is easy for the illiterate
- It favours people without money
- It enable people to get goods they can't produce

Disadvantages of barter trade

- It was difficult to move bulky goods
- There was no standard measure of value for goods
- It was difficult to get a trade partner
- It was hard to store wealth.

Monetary trade

This is the system of trade that involves the use of moneys a medium of exchange

- The Arabs introduced the first form of money called the cowries shells – The Indians introduced the Indian rupees
- The Indian rupees were the second form of money.

Advantages of monetary trade

- It discourages cheating
- It is easier to carry money than physical goods
- There is a standard measure of value

Disadvantages of monetary trade

- It encourages stealing
- Money can easily be lost
- It doesn't promote friendship among people

Activity

1. Mention the system of trade that was common amongst the people of pre-colonial Uganda

2. Mention two ways that people of pre- colonial Uganda were socially organized.
3. State two advantages of barter trade
4. Give the meaning off the term culture
5. Give any two ways of promoting culture in our society today
6. List any two types of relationships
7. Write down any three examples of values observed by people in our society today
8. State any two ways culture is important in the society
9. Which cultural practice is common amongst the Bagisu?
10. Identify any two duties of a clan head
11. Mention two symbols of a clan
12. Under which type of culture do we find the following
 - a. Food
 - b. Language

FOREIGN INFLUENCE IN UGANDA

Foreigners in Uganda

A foreigner is a person who comes and lives in a country that is not his/her own.

Foreign influence refers to the different changes that took place in Uganda as a result of the coming of the foreigners

Groups of foreigners that came to Uganda

- Traders
- Explorers
- Missionaries
- Colonialists

Traders

Arab traders

- This was the first group of foreigners to come to Uganda. Arab traders came from Saudi Arabia using dhows that were driven by monsoon
- Ahmade Bin Ibrahim was the first Arab trader to come to Uganda
- Kabaka Ssuuna II welcomed the first Arab trader.

Reasons for the coming of Arab traders in Uganda

- To trade
- To spread Islam
- To ran away from religious persecution

Examples of trade items that Arabs brought; guns, gun powder, clothes, beads, glasses

Too; slave, ivory, hides and skins, local salt

Why Arabs took long to come to Uganda

- There were no clear routes
- They feared attacks from hostile tribes
- They feared attacks from dangerous wild animals

Effects for the coming of Arabs to Uganda

- They started slave trade
- They introduced Zebu cattle
- They introduced Swahili culture
- They introduced Islam

- They introduced new trade items

Problems that were faced by the Arab traders in Uganda

- Attacks from hostile people
- Attacks from wild animals
- Attacks from tropical diseases
- They walked/moved long distances

Slave trade

Slave trade is the buying and selling of human beings.

Slavery is the state of being owned by another person.

A slave is a person who is owned and controlled by another person

Reasons why slave trade was introduced

- Slaves were needed to carry goods
- Slaves were needed to do domestic work
- They were needed to work on plantations and in mines

Ways slaves were got

- Through raiding villages
- Through capturing them in lonely places
- Through getting war captives from African kings and chiefs

NB: Baganda and Banyoro are examples of tribes that took part in slave trade

Methods used to stop slave trade

- Building the Uganda railway
- Signing agreements
- Through missionary work

Reasons why it was difficult to stop slave trade

- Kings and chiefs were supporting it
- There was still need for cheap labour
- The Arabs opposed the abolition of slave trade

Effects of slave trade

- It led to introduction of new trade items
- It led to death of people
- Families broke up
- It increased famine
- Many people were displaced from their homes

Reasons why Islam took long to spread in Uganda

- Arabic language was very hard for people to learn
- Many people feared circumcision
- The people who were spreading Islam carried out slave trade
- Arabs who wanted to spread Islam had mainly come to trade

Indian Traders

- These came from India
- They came into groups i.e., Banyans and Indian coolies
- Banyans used to lend money
- Indian coolies were brought to build the Uganda – Kenya railway.

Contribution of famous Indians

Allidina Visram; opened up the first shop in Kampala

Madhivan: -started Kakira sugar plantations in Lugazi

Mehta (NK): -started Lugazi sugarcane plantations

Explorers

- An explorer is a person who goes to a new place to know more about it
- Most explorers who came to Uganda were sponsored by the (RGS)

Why explorers came to Uganda

- To find the source of the Nile
- Love for adventure
- They wanted to open up away for missionaries

Famous explorers and their contribution

John Speke and Richard Burton	• They were sent by the RGS to search for the source of the R. Nile • John Speke was the first European to see the source of the Nile
Sir Samuel Baker	• Sir Samuel baker tried to find the source of R. Nile from its mouth • He was the first European explorer to see L. Mwitanzigye and named it L. Albert • He saw kabalega falls and named it Murchison falls after lord Murchison the president of RGS by then.
Joseph Thomson	• He saw Mountain Masaba and named it Mt. Elgon
HM Stanley	• He was sent to prove if L. Victoria was the source of R. Nile • He wrote a letter inviting missionaries to come to Uganda

A SKETCH MAP SHOWING ROUTES USED BY EXPLORERS

Problems faced by explorers

- Attacks from hostile tribes
- Attacks from wild animals
- Tropical diseases
- Poor transport network

Effects of the coming of explorers

- Uganda was made known to the rest of the world
- They renamed physical features
- They led to the coming of missionaries

Activity

1. Name the first group of foreigners to come to Uganda
2. State the main reason for the coming of the Arab Traders to Uganda
3. How were the dhows useful to the early traders who came to Uganda?
4. Why is Ahmed Bin Ibrahim remembered in the history of Uganda
5. How were the monsoon winds helpful to the early Arab traders to Uganda?

6. Which type of cattle did the Arabs introduce into Uganda
7. How did the Swahili come into existence in East Africa?
8. State two economic contributions of the Arabs in Uganda
9. Give any one reason why Islam took long to spread in Uganda?
10. Mention any two ways the slaves were obtained in Uganda during slave trade
11. What name is given to the group of slave traders from Egypt and Sudan who used to raid northern Uganda
12. Why was sir Samuel baker liked by the people of Acholi?
13. Mention any one step that was taken to bring slave trade to an end
14. What role did Dr. David Livingstone play towards ending slave trade?
15. Give any two ways slave trade negatively affected the people of east Africa
16. How did Indians promote the economic development of Uganda?

Christian missionaries in Uganda

A missionary is a person who spreads his /her religion in a foreign land

- The missionaries came to Uganda after the invitation from kabaka Muteesa I
- HM Stanley wrote a letter on behalf of kabaka Muteesa I inviting missionaries
- The letter was taken by Linant De Bellefands and it appeared in the daily telegraph newspaper
- The first group of missionaries arrived in Uganda on 31 July 1887

Reasons for the coming of Christian missionaries to Uganda

- To spread Christianity
- To stop slave trade
- To teach people how to read and to write
- To spread their culture

Reasons why Muteesa invited missionaries

- He wanted them to bring him guns
- He wanted them to help him in fighting his enemies
- He wanted them to teach his people how to read and to write
- To get trade partners

Missionary groups

Protestant missionaries

- This was the first group of missionaries to come to Uganda
- They were sponsored by the church missionary society (CMS)
- Alexander MacKay was the leader of the protestant missionary
- Rev. CT Wilson, Sher gold smith and Oneill were the first missionaries to come to Uganda

Alexander MacKay

- He introduced the first printing machine in Uganda.
- He taught practical and vocational skills like carpentry

Importance of the printing press to the first early missionaries

- It was used to print prayer books
- The printing press was used to print reading materials.

Other protestant missionaries and their contributions

Missionary	Contributions
Dr. Albert cook	- He built Mengo hospital (first hospital in Uganda) - He treated people suffering from sleeping sickness on the shores of Lake Victoria
Kenneth Borup	- He introduced the first growing cotton seeds - It was called the American upland cotton
Robert Ashe	- He introduced the first bicycle in Uganda
Bishop Alfred tucker	- He mobilised facilities to support the activities of IBEACO
Bishop Hannington	- He was murdered by chief Luba in Busoga on the orders of kabaka Mwanga - He was murdered for using a wrong route to enter into Buganda
Apollo kivebulaya	- He spread Christianity in western Uganda and eastern DRC

Roman Catholic Missionaries

- This was the second group of Christian missionaries to come to Uganda

Examples of roman catholic missionaries

Fr. Simeon Lourdel

Bro. Amans Delmas

Groups of roman catholic missionaries

1. White fathers

They were the first roman catholic missionary group.

They were led by father Simeon Lourdel

2. The mill hill fathers

They built Namityango college

3. The Verona fathers

They had the mission station in Northern Uganda

Schools built by missionaries

- Namityango college
- Kings' college Buddo
- Gayaza high school
- Mengo ss etc.

Hospitals built by missionaries

- Mengo hospital
- Lubaga hospital
- Nsambya hospital

Problems faced by missionaries

- Tropical diseases
- Attacks from hostile tribes
- Attacks from dangerous wild animals
- Moving long distances

Effects for the coming of Christian missionaries

- They spread Christianity
- They helped to stop slave trade
- They introduced new crops
- Missionaries taught people how to read and to write
- They built schools and hospitals

UGANDA MARTYRS

- A martyr is a person who dies for his or her faith in God.
- The Uganda martyrs are a group of 23 Anglicans and 22 catholic converts to Christianity in the historical kingdom of Buganda
- They were killed on orders of kabaka Mwanga
- The deaths took place at a time when there was three- way religious struggle for political influence
- Mukajanga was the chief executioner of the Uganda martyrs.
- The martyrs were killed (burnt) on 3rd June at Namugongo

The first Uganda martyrs: -

- Yusuf Rugarama
- Makko Kakumba
- Nuwa Serwanga

Religious wars in Buganda

- After the killing of Uganda Martyrs, Mwanga planned to get rid of the remaining Christian and Muslim leaders
- Word of his plan leaked out and a rebellion by Christian and Muslims together brought Mwanga's brother Kiweewa to the throne
- In October 1888, the Muslims seized power, expelled the Christian leaders and when kiweewa refused to be circumcised he was replaced by Kalema.
- On 11th October 1889, Mwanga entered and took over Buganda capital with the help of protestants
- Friction between the Catholics and the protestant parties led to fighting in January 1892 in Mengo.
- Lugard supported the protestants against stronger catholic side in the fighting forcing Mwanga and the Catholics to flee
- On march 30th 1892, a new treaty was made
- This treaty assigned separate areas of protestants, Catholics and Muslims

Activity

1. Give any two reasons why kabaka Muteesa I invites Christian missionaries to Buganda
2. Name the organization which funded most protestant missionaries to Uganda,
3. How was the printing press useful to the missionaries in Uganda?
4. Name the Muganda missionary who spread Christianity in Tooro and eastern parts of the DRC
5. Give two ways Dr. Albert cook promoted the development of the health sector in Uganda
6. Give three positive contributions of the Christian missionaries in Uganda
7. How did the coming of Christians lead to the coming of colonialists?
8. Identify two negative results of the coming of the missionaries

9. Name the place where most of the Uganda martyrs met their death
10. On which day do Christians remember the death of the Uganda martyrs?
11. Mention two missionary groups that came to Uganda
12. How were the following missionaries important to the development of Uganda
 - a) Kenneth Borap
 - b) Alexander MacKay
13. Mention two problems faced by missionaries

Colonialist in Uganda

A colonialist is a person who controls an inferior country on behalf of his home country

A colony is a country which is controlled and developed by a powerful country with an aim of having permanent settlement

A protectorate is a country which is controlled by another country for economic gain

Reasons for the coming of colonialists

- They wanted to get raw materials for their home industries
- They wanted to invest their surplus capital
- They wanted to find market for their goods
- The desire for political pride

Egypt's attempt to colonies Uganda

- The first country that attempted to colonise Uganda was Egypt
- Khedive Ismael of Egypt appointed governors of the equatorial province (an area of southern part of Sudan and northern Uganda)

Governors of the equatorial province

- Sir Samuel baker
- Charles Gordon
- Emin pasha

How did sir Samuel baker help the people of Acholi

- He helped to stop slave trade in Acholi

How did sir Samuel baker help to fight slave trade in Acholi

- He built fort Patiko for defense against slave traders
- He armed the people of Acholi.

Methods used by colonialists to acquire territories

- By using force
- By signing agreements
- By using trading companies
- Through missionary work

IBEACO (imperial British East African company)

- Sir William MacKinnon was the founder of the IBEACO
- Captain Fredrick Lugard was the representative of IBEACO in Uganda

Reasons why IBEACO was formed

- To carry out trade
- To protect the missionaries
- To maintain British influence in Uganda

IBEACO stopped operating in Uganda because it became bankrupt

Reasons why IBEACO ran bankrupt

- It lacked a reliable source of income
- It employed many people who needed a big pay.
- It spent a lot of money in wars
- It had corrupt officials
- IBEACO protected missionaries. When it ran bankrupt bishop Alfred tucker tried to look for funds to support IBEACO so that it could continue protecting missionaries

Establishment of colonial rule in Uganda

Sir Gerald portal

- He was sent to study the political situation in Uganda
- He built fort portal in Kabarole
- He recommended Uganda to become a British protectorate

Lord Rosebery

- Declared Uganda a British protectorate five months after portals death

Some British colonial administrators in Uganda and their contributions

Sir henry Colville

- He brought Bunyoro under British rule

Sir harry Johnston

- He signed the 1900 Buganda agreement on behalf of the British protectorate government

Sir Hesketh bell

- He encouraged the growing of cash crops in Uganda
- He introduced steamers on L. Victoria
- He linked the railway line from Jinja to Namasagali

Sir Robert Corydon

- He formed the legislative council (LEGCO) in Uganda in 1921

Sir Philip Mitchell

- He promoted higher education in Uganda
- He turned Makerere college into a university

Sir john hall

- The first three Ugandans on the LEGCO were nominated during his term of office

Sir Andrew Cohen

- He exiled kabaka Muteesa II to Britain
- The construction of parliamentary buildings started during his term

Reasons why kabaka Muteesa was exiled

- He rejected the idea of the east African federation
- He demanded Buganda's independence from Uganda

Sir Walter Coutts

- He was the last British governor in Uganda
- He granted Uganda her independence

Namirembe agreement of 1955

- Namirembe agreement was signed between Buganda and the colonial government
- Michael Kintu signed the agreement on behalf of Buganda and Keith Hancock on behalf of the colonial government

- Kabaka Muteesa II had refused the idea of the east African federation
- People boycotted European goods and striked because of exiling of kabaka Muteesa II by Andrew Cohen

Qn: Give a reason why kabaka Muteesa II was exiled

Effects of colonial rule

- The people of Uganda learnt leadership skills
- Many roads were built in Uganda
- Many schools were built in Uganda
- Hospitals were built in different parts of Uganda

Negative effects

- The people of Uganda lost their independence
- Heavy taxes were imposed on the people of Uganda
- Traditional leaders lost their power.

Activity

1. Write IBEACO in full
2. How was sir William MacKinnon related to **IBEACO**?
3. Give any two reasons why **IBEACO** was formed
4. Mention any two reasons why **IBEACO** ran bankrupt
5. Name the Christian missionary who mobilized funds from Europe to support IBEACO
6. State any two methods used by colonialists to establish their rule
7. How did sir Philip Mitchell promote higher education in Uganda
8. Why was sir Edward Muteesa exiled to Britain by sir Andrew Cohen?
9. Mention any two systems of administration that were used by the British colonialist in Uganda
10. Write short notes about the following colonial administrators
 - i) Sir Hesketh Bell
 - ii) Sir Andrew Cohen
 - iii) Sir harry Johnston
11. List any two effects of colonial rule
12. Who signed the Namirembe agreement on behalf of
 - a) Buganda
 - b) Colonial government

THE ROAD TO INDEPENDENCE

Characteristics of colonial rule

Independence is the state of being free from influence of authority

Political independence is the state when a country is free from control of another country

Characteristics of colonial rule

- There was forced labour
- Taxation
- Segregation
- Introduction of cash crops
- Foreign laws

Why colonialists introduced cash crop growing

- They wanted to get raw materials for their industries

- They wanted the natives to get money for paying taxes

Why colonialist taxed Ugandans

- They wanted to get money to pay workers
- They wanted to get money to provide social services

Why some Ugandans refused to pay tax

- People were poor
- Tax collectors were harsh
- Taxes were high

How did people react towards colonial rule

- Some collaborated
- Some resisted

Collaboration

Collaborators were Ugandans who helped colonialists to establish their rule

Examples of collaborators

- Semei Kakunguru
- Nuwa Mbaguta
- Omukama Kasaga
- Sir Apollo Kaggwa

Reasons why some Ugandans collaborated with the colonialists

- They wanted protection
- They wanted favour from the colonialists
- Some wanted riches

How did Africans collaborate

- Through collecting taxes
- They signed treaties
- They provided land
- They provided information about resistors

Resistance towards colonial rule

- A resistor is a person who opposed colonial rule.

Examples of resistors

- Kabalega
- Kabaka Mwanga
- Chief Awich

Reasons why some Africans resisted

- Loss of power by kings and chiefs
- Loss of land
- Harsh rule of colonialists

Reasons why resistance to colonial rule was unsuccessful

- Disunity among the people of Uganda
- Natives had inferior weapons
- The natives never had strong standing army.

Rebellions against British colonial rule

A rebellion is an armed struggle against the existing government

Examples of rebellions

- Nyangire rebellion
- Lamogi rebellion
- Mwanga's rebellion

Nyangire rebellion: -

- Nyangire means I have refused
- It was staged by the Banyoro and led by Omukama Kabalega
- The main cause was the Banyoro never wanted to be ruled by the Baganda chiefs who were the agents of the British

Lamogi rebellion

- It was led by the people of Acholi
- It was led by chief Awich
- The main cause was forceful gun registration by the British
- The British wanted to disarm the Acholi

Mwanga's revolt

- It was staged in Buganda
- Mwanga was the leader of this rebellion
- The cause of the revolt was the need for Buganda's independence. Mwanga never wanted to lose his power.

Effects of rebellions

- They led to death of people
- They led to displacement of people
- They led to destruction of property
- They promoted African nationalism

Sudanese mutiny

- A mutiny is a rebellion staged by an armed force against their officers
- The Sudanese mutiny was staged by the Sudanese soldiers against the British

Causes of the Sudanese mutiny

- The Sudanese were under paid
- The Sudanese were poorly fed
- They were tired of fighting
- They wanted better living conditions

Activity

1. Give the meaning of the term independence
2. State any two characteristics of colonial administrative systems
3. Give two ways the people of Uganda reacted towards colonial rule.
4. State any two ways the people of Uganda were mistreated during colonial rule
5. Name any two colonial resisters
6. Give any two reasons why resistance against colonialists in Uganda was unsuccessful
7. Why did the people of Uganda resist against colonial rule (state two reasons)
8. Mention any two rebellions that were staged against the British rule in Uganda
9. State the major causes of Lamogi rebellion
10. How did rebellions affect people (state two ways)
11. Why is Seychelles islands historically remembered in Buganda and Bunyoro?

12. Identify any two ways how some Africans collaborated with the colonialists

Formation of the legislative council (LEGCO)

- LEGCO was a law-making body during colonial rule
- LEGCO served as the parliament during the colonial times
- It was formed in 1921 during the times of sir Robert Corydon

Reasons why the LEGCO was formed

- To make laws
- To advise the colonial government

First representative of the LEGCO

- Kawalya Kaggwa from Buganda (central region)
- Yekonia ziraba Muzaale from eastern region
- Petero Nyangabyaki Akiiki representing the western region
- Yekosofati innyor joined later to represent the northern region

NB: Africans joined the LEGCO through nomination

Ways LEGCO helped Ugandans to demand for independence

- It gave natives courage to air their complaints
- It laid a strong foundation for native leadership
- Members on LEGCO encouraged their members to form associations

Ways Ugandans demanded for their independence

- Through peaceful struggle: e.g., Forming political parties
- Through armed struggles e.g., staging rebellions

Colonial Administrative System

Direct rule

Indirect rule

Direct rule: This was the system of administration where the colonialists ruled natives by themselves

Reasons why direct rule was used

- The colonialists wanted to promote their culture
- They wanted to show their superiority over Africans
- They wanted to exploit resources of countries they controlled

Disadvantages of direct rule

- It was expensive
- Local leaders lost power
- It led to over exploitation of Africa's resources
- It was harsh
- It increased rebellions

Direct rule

This was the system of administration where local leaders were used to rule the natives on behalf of the colonialists

Reasons why colonialists used indirect rule

- To control rebellions
- It was cheap in terms of paying local leaders
- To communicate with natives easily

Advantages of indirect rule

- It preserved the cultural setting
- Local leaders learnt new leadership skills
- It was cheap to pay leaders
- It made the communication between natives and colonialists easy

Disadvantages of colonial rule

- The natives hated their local leaders
- It caused division among natives
- Native leaders were used as puppets by colonialists

Indirect rule was used in Buganda, Tooro

Activity

1. Write Legco in full
2. State any two reasons for the formation of the LEGCO in Uganda
3. Name the British governor of Uganda who formed the first LEGCO in 1921
4. Why were Ugandan natives unhappy with the LEGCO before 1945?
5. Mention the Ugandan natives who were nominated on the LEGCO in 1945 to represent the following regions of Uganda
 - i) Central region
 - ii) Western region
 - iii) Eastern region
6. How did the first Ugandan natives join LEGCO?
7. Give any one way the LEGCO help the people of Uganda to demand for their independence
8. Mention any two methods the Ugandan natives used to demand their independence
9. Give two reasons why colonialist used indirect rule
10. State two causes of the Sudanese mutiny
11. List two areas in Uganda where indirect rule was used

HOW UGANDA BECAME A NATION

A nation is a group of people with the same historical background in the same area under one government

Types of nations

1. Heterogeneous nation

These are nations where people have different origins and cultures.

2. Monolithic nation

These are nations of people with the same origin and culture.

Colonial agreements to make Uganda a nation

Heligo land treaty (1890)

The Heligo land treaty was signed between Germany and England

In the heligo land treaty the British took over Uganda

The 1894 protectorate treaty

- It was the first colonial agreement to be signed in Uganda
- It was known as the protectorate treaty because the British agreed to protect Buganda and their entire Uganda from other colonial powers

The 1900 Buganda agreement

- It was signed between Buganda kingdom and the British protectorate government
- Buganda kingdom was represented by sir apollo Kaggwa as a signatory while sir harry Johnston signed on behalf of the protectorate government

Terms of the 1900 Buganda agreement

- Land
- Governance
- Taxation

Effects of the 1900 Buganda agreement

- Gun and hut taxes were introduced
- Buganda land was divided into crown land and milo land
- Kabakas powers were reduced
- Buganda kingdom was enlarged and divided into 20 counties

Recommendations of the 1900 Buganda agreement

- Gun and hut taxes were introduced
- Buganda land was to be divided into crown land and milo land
- Kabakas powers were to be reduced and added to Lukilko
- Buganda kingdom was to be enlarged and divided into 20 counties

Kabaka Mwanga was unable to sign the 1900 Buganda agreement because he was in exile

Daudi chaw was unable to sign the 1900 Buganda agreement because he was still an infant. Regent helped the young king

Regents

A regent is a person who rules on behalf of a young king

Regents of Kabaka Daudi chaw

- Sir apollo Kaggwa
- Stansas Mugwanya
- Zakaria kisingiri

Tooro agreement

The agreement was signed between omukama Kasagama of Tooro and sir harry Johnston

This agreement made Tooro a British protectorate

Effects of the 1900 tooro agreement

- Hut and gun taxes were introduced
- Tooro became part of Uganda protectorate
- Crown land was set aside for the British government

Ankole agreement of 1901

- It was signed between Omugabe Kahaya of Ankole and sir Fredrick Jackson on behalf of the British
- In this agreement, hut and gun taxes were introduced

Effects of the 1901 Ankole agreement

- Ankole kingdom was enlarged
- Hut and gun taxes were introduced
- Ankole became part of Uganda protectorate

Bunyoro agreement of 1933

- It was signed between sir Bernard Bourdillon on the behalf of the British protectorate and omukama Tito Gafabusa Winyi II
- It was signed to strengthen British rule in Bunyoro

Activity

1. What is a nation?
2. Mention the types of nation
3. Why does Uganda have no national language
4. Mention any three treaties that were signed to put different parts of Uganda under colonial rule
5. State at least two regents of kabaka Daudi Chwa
6. Why were the following Buganda kings unable to sign the 1900 Buganda agreement?
 - i) Daudi Chwa
 - ii) Kabaka Mwanga
7. Who signed the 1900 Buganda agreement on behalf of: -
 - a) Buganda
 - b) British protectorate government
8. Mention the three main terms of the 1900 Buganda agreement
9. State two effects of the 1900 agreement
10. Mention the two forms of taxes that were introduced in Uganda during colonial rule
11. Name the special land that was given to the British protectorate during the signing of the 1900 Toro agreement

EVOLUTION OF UGANDA BOUNDARIES

- At one time Uganda extended from the western rift valley to the Eastern rift valley
- The modern boundaries of Uganda took shape through changes that ran from 1890 to 1926
- Some places of other countries were added to Uganda and others were taken away from Uganda

EVOLUTION OF UGANDA'S BOUNDARIES (MAP)

Nyanza province

it was transferred from Uganda to Kenya 1902

it was transferred to bring the Uganda railway under one administration

west Nile

it was transferred from Belgian Congo (DRC) to Uganda

The British wanted to have full control over the flow of R. Nile

Lado enclave

It was transferred to South Sudan

It was transferred to separate the Sudanese from the Acholi in order to control resistance against colonial rule

North Eastern part of Uganda

It was transferred from Uganda to Kenya

It was transferred to separate the Karimojong from the Turkana in order to control cattle rustling

The western part of Uganda

- The area near L. Albert was transferred to Belgian Congo in 1910 while the area near lake Edward was given to Uganda
- The colonialists wanted to use the western rift valley to create a natural boundary between Uganda and DRC

Physical features that were used when fixing of Uganda's boundaries

- Lake albert and Edward and the western rift valley along the border of Uganda and DRC
- River Semliki
- River Kagera along the border of Uganda and Tanzania
- Mountain Elgon along the border of Uganda and Kenya

Effects of the fixing of Uganda's boundaries

- Some people lost their historical origin
- Some natives were separated from their relatives
- Some tribes and communities were separated

Activity

1. Name the main physical features that was used by the colonialists to create a boundary between Uganda and DRC
2. Apart from the above features mention any two physical features that formed a natural boundary between Uganda and DRC
3. Why was the west Nile transferred to Uganda by the British colonialists?
4. Give one reason why the Nyanza province was transferred from Uganda to Kenya during the evolution of Uganda's boundaries
5. Why was the Lado enclave transferred from Uganda to Sudan when fixing Uganda's boundaries?
6. Name the boundary to which the western Nile belonged before it was transferred to Uganda
7. How did the fixing of Uganda's boundaries affect the people of Uganda? Give two ways
8. Why did colonialists use physical features when fixing boundaries of Uganda?
9. Mention the main physical feature that was used when fixing the boundaries of Uganda with
 - i) DRC
 - ii) Kenya

Formation of political parties

- Ik musaazi formed the Uganda farmers association to demand for better prices of cash crops and to allow Ugandans process and export their own cash crops
- Bataka party led by James Miti together with the farmers union staged riots in order;
 - i) To have foreign laws to favour all people
 - ii) To have power to choose their own government
 - iii) To restore powers of the kabaka
- The Bataka party and Uganda farmers association became the genesis of the formation of national political parties in Uganda
- A political party is a group of people with the same political ideologies and goals

Why political parties were formed in the struggle for independence

- To unite people in the struggle for independence
- To sensitize people
- To deal with common problems affecting people

Political parties before independence

Uganda national congress

- It was the first political party to be formed in Uganda
- It was formed by IK Musasaazi and Abubaker Mayanja in 1952

Objectives of UNC

- To struggle for Uganda's independence
- To unite all Ugandans
- To promote democracy and economic interests of Ugandans

It faced challenges of opposition from the Lukiiko and internal problems by party leaders

Democratic party (DP)

- It was formed by Joseph Kasolo
- DP was mainly for Catholics
- In 1961, general elections were held and DP won. This made Benedicto Kiwanuka the leader of DP by then to become the first chief minister of Uganda

Reasons for the formation of DP

- To demand for Uganda's independence
- To protect the rights of Catholics mainly in the government

Uganda people's congress (UPC)

- UPC was formed by splinter members of UNC and UPU
- The leader of UPC was Dr. Milton Obote
- It made an alliance with Kabaka Yekka party and won the 1962 general elections leading Uganda to independence
- Its main objective was to lead Uganda to independence

Kabaka yekka (KY)

- It was formed by Simeon Masembe and Augustine Kamywa who were the members of Buganda Lukiiko

Objectives of Kabaka Yekka

- To defend the Kabaka and his kingdom
- To promote the interests of Buganda

Other political parties that were formed before independence

- United Congress Party led by David Lubega
- Uganda People's Union (UPU) led by Wilberforce Nadiope

Current political parties in Uganda

- National Resistance Movement (NRM)
- National Unity Platform (NUP)
- Democratic Party (DP)
- Uganda People's Congress (UPC)

How political parties helped to demand for independence

- They united people
- They sensitized people about colonial rule

- They fought for people's rights

Influence of world wars on Uganda's independence

- The first world war was between Germany against France, Russia and Britain
- It took place between 1914 and 1919
- Germany lost the war
- World war II took place between 1939 and 1945
- Germany together with Italy attacked Poland which led countries like France, Britain and other countries to join Poland.
- Ugandans were involved in the war because their colonial masters took men to work as soldiers in the war

Influence of world wars on Uganda's independence

- Ugandans who went to fight learnt military skills
- Ugandans who went to fight got the courage to fight for their freedom
- Ugandans learnt that whites could be defeated
- It increased the spirit of nationalism

Effects of the world war on the economy

- The prices of cash crops reduced
- It led to poverty among the people of Uganda
- Reasons why Ugandans demanded for their independence
- They wanted to regain their lost power
- They wanted to have control over their natural resources
- They wanted to take part in choosing their own leaders
- They wanted to be free from forced labour
- They wanted to regain their lost land

Leading personalities in Uganda's demand for independence

Ignatius Kangave Musaazi

- He formed the Uganda African farmers union
- In 1952, he formed UNC with Abu Mayanja
- He was recognised as a national hero because he formed the first national political party in Uganda

Benedicto Kiwanuka

- He led DP against UPC in the 1961 elections
- He was one of the founding leaders of DP
- He became the first chief minister of Uganda

Apollo Milton Obote

- He was the leader of UPC which led Uganda to independence
- He led the alliance of kabaka Yekka and UPC in 1962
- He made Uganda a republic in 1967

Sir Edward Muteesa II

- He was the first president of Uganda
- He was exiled to Britain by sir Andrew Cohen for refusing the idea of the east African community

Problems the people of Uganda faced during their struggle for independence

- Some of them were imprisoned
- Some people were murdered
- Disunity among all people in Uganda
- Some were tortured and denied freedom of movement

Kabaka crisis 1953

- Kabaka crisis was the period in Buganda when there was no king
- The king of Buganda (kabaka Muteesa II) had been exiled by sir Andrew Cohen
- The Namirembe agreement of 1955 was signed to bring back the kabaka from exile

Uganda gains her independence

1961 general elections

- Democratic party (DP), Uganda people congress (UPC) and Uganda national congress (UNC) took part in these elections
- DP won with 43 seats in the national assembly followed by UPC with 35 while UNC got only one seat.
- Benedicto Kiwanuka became the first chief minister

1962 general elections

- General elections were held in Uganda in April 1962 to prepare for independence on 9th October
- The results were a victory for the UPC which had made an alliance with kabaka Yekka
- UPC led Uganda to independence

Activity

1. what is a political party?
2. Mention any three political parties that were formed in Uganda before independence
3. State the main reason for the formation of political parties in Uganda in 1950s
4. Give one-way political parties helped to demand for Uganda's independence
5. Why is IK musaazi considered to be a national hero in Uganda?
6. Name the first political party to be formed in Uganda
7. Which political party led Uganda to independence?
8. How did Benedicto Kiwanuka become the first chief minister of Uganda?
9. How did world wars speed up the independence process of Uganda?
10. State two personalities who helped in the independence struggle of Uganda
11. List two problems people of Uganda faced during their struggle for independence
12. How was UPC able to win the 1962 general elections?
13. Which agreement was signed to bring back kabaka Muteesa II from exile?

TERM III

UGANDA AS AN INDEPENDENT NATION

Independence is the state of being free from influence of authority

An independent nation is a country that is free from control of another country

A constitution is a set laws used to govern a given community

Characteristics of a nation

- It has a national leader
- It has its own citizens
- It has clearly marked boundaries
- It has national symbols

How did Uganda become a republic?

- When Uganda attained her independence in 1962, Dr. Milton Obote became the first executive prime minister and Muteesa II became the first president of Uganda
- As a result of misunderstanding between Dr. Milton Obote and kabaka Muteesa II, Milton Obote attacked kabakas palace in 1966 and exiled kabaka Muteesa II to Britain
- The exiling of kabaka caused the kabaka crisis.
- Dr. Milton Obote abolished all kingdoms in Uganda and declared Uganda a republic in 1967

NB: A republic is a country that is governed by an elected president

Presidents of Uganda since independence

- It promotes the spirit of nationalism and national unity

National currency

- The Uganda national currency is called the Uganda shilling
- 100 shillings is the smallest currency value while 50,00sh is the highest currency value of Uganda’s currency

National constitution

- Uganda has had four constitutions
- The 1995 constitution is the constitution Uganda is using currently
- The national constitution has set laws that are used to govern Uganda

Activity

1. Mention any three symbols of Uganda as a nation
2. Give any two ways national symbols are important to a country
3. Name the flag which was replaced by the Uganda national flag
4. What do the following colours symbolize on the Uganda national flag
 - i) Black
 - ii) red
5. How do Ugandans show respect to the nation when the Uganda national flag is being raised?
6. Why is the Uganda flag sometimes flown at a half must?

7. Mention any two places where the Uganda national flag is usually flown
8. State one condition that can lead to a national mourning
9. Why do Ugandans who participate in international games carry the Uganda national flag
10. Match the information in list A with that given in list B correctly

List A	List B
Grace Ibingira	Designed the Uganda coat of arms
George William Kakoma	Designed the independence monument
Maj. Akorimo Kanuti	Composed the Uganda national anthem
Paul Mukasa	Designed the Uganda national flag
Gregory Maloba	Raised the Uganda national flag on 9 th October 1962

11. What do the following features symbolize on the Uganda national coat of arms
 - i) Drum
 - ii) Coffee and cotton

DEMOCRACY IN UGANDA

Democracy is the system of governance where all people are given a chance to exercise their rights

Democratic government

This is the type of government which gives people chance to exercise their rights

Indicators of democracy

- Respect for human rights
- Elected leaders
- Equality of all citizens
- Constitutional rule

Advantages of democracy

- It promotes national unity
- It promotes peaceful change of leadership
- It promotes equality of all citizens
- It increases the spirit of nationalism and patriotism

Disadvantages of democracy

- Decision making takes a long time
- It is very expensive to exercise
- The interests of the minority is not catered for

Challenges faced when exercising democracy

- High levels of poverty
- Corruption
- Tribalism
- High crime rate

Roles of citizen in promoting democracy

- By taking part during elections
- By standing as a candidate in political offices
- By respecting the rights of others
- By accepting the results of elections

ELECTIONS

An election is a process of choosing leaders by voting

Types of elections

General elections: - this involves choosing leaders at the national level

Referendum: - an election carried out to decide on an important political issue in a country

Local elections

These are elections carried out to choose leaders at a local council level

Primary elections

These are elections carried out within a political party to choose a candidate to contest for a specific office in the general elections

By-election

This is an election carried out to fill a vacant political post

Causes of by-elections

- Death of the elected leader
- Mental illness of the elected leader
- When an elected leader resigns
- When an elected leader resigns for a long time
- By-elections lead to loss of government revenue

Characteristics of an eligible voter

- One should be an eligible voter
- One should be a citizen of Uganda
- One should be 18 years of age and above

Qualification for a member of parliament

- One should be an eligible voter
- One should be a citizen of Uganda
- One should be 18 years of age and above
- One should have a minimum qualification of advanced level certificate or its equivalent

ORGANIZATION OF NATIONAL ELECTIONS

- The electoral commission is the body responsible for organizing and conducting elections in a country
- It is under the ministry of justice and constitutional affairs
- Justice Simon Byabakama is the current chairperson of the Uganda electoral commission
- General elections in Uganda are conducted after every five years

Roles of the electoral commission

- To register voters
- To prepare election materials
- To train election officials
- To count votes and release results
- To carry out civic education

Activity

1. Give the meaning of the term democracy
2. Mention any two ways democracy is important to a country
3. Identify any two indicators of democracy
4. State any two challenges faced when exercising democracy

5. How can citizens participate in promoting democracy in the country? state two ways
6. State any three types of elections
7. List two causes of by-election
8. How do by elections affect the economic development of a country
9. Mention two conditions one must fulfill in order to participate in national elections
10. State any conditions presidential candidate must have fulfilled in order to contest as a candidate
11. How can democracy be a disadvantage in a country/community (state two ways)

Key activities in the electoral process

- voter registration
- voter education
- party primary campaigns
- Training of the electoral offices
- Vote casting
- Vote counting
- Announcing the election results

Terms/officials related to elections

Polling station

- A place where voting take place

Polling day

- A place where voting take place

Polling constable

- This is the person who is in charge of security at the polling station

Polling officer or presiding officer

- This is the person who is in charge of elections at the polling station

Polling assistant

- This is a person he or she who assists a polling officer at the polling station

An electorate

- Refers to people in a country who qualify to vote

Returning officer

- This is the person in charge of elections in the district

Proxy

- Is a person who is given authority to vote on behalf of someone who is absent

A candidate

- Is a person who stands to be voted

Voting by proxy

- This is when a person who is absent gives authority to another person to vote on his/her behalf

An electoral college

- It is a group of electors who are selected to elect a candidate for a particular office

An eligible voter

- A person who qualifies to vote

Election monitors

- Is a group of people from foreign country who come to watch over elections

A constituency

An area represented by a member of parliament

- Challenges faced by the electoral commission
- Shortage of funds
- Dishonest electoral officials
- Election malpractice
- Delay of election materials

Possible solutions to the challenges facing electoral commission

- By providing election materials in time
- By carrying out more civic education
- By punishing dishonest electoral officials
- Increasing funding into the electoral commission

Malpractice

- These are illegal actions done during elections

Before election malpractice

- Bribing of voters
- Tearing posters of candidates
- Fighting between supporters and candidate

During elections

- Bribing voters
- Ballot stuffing
- Campaigning on voting day
- Harassing voters of a particular candidate

After elections

- A candidate refusing to accept defeat
- Miss recording of the election results
- Attacking voters of different candidates
- Election materials
- Ballot paper
- Ballot box
- Voter's register
- Nomination forms
- Declaration forms
- Ink

ELECTORAL SYSTEM

- Secret ballot system
- Open election system

Secret ballot system

- This is a system where a voter uses a ballot paper and secretly selects a person, he/she wants
- This is the modern way of voting in the whole world

Advantages of secret ballot system

- It promotes friendship among people
- A voter is free from interference

- Elections can easily be monitored by a computer

Disadvantages of secret ballot system

- It is very expensive to conduct
- Votes can easily be rigged
- It is difficult for the illiterate and the blind
- Election results take long to be declared

Open elections

- These are elections held when everyone is seeing every step
- It is done by lining up behind the candidate or by putting up hands

Advantages of open elections

- They are very cheap to conduct
- Results cannot easily be rigged
- It is simpler for the illiterates
- Releasing of election results takes a short time

Disadvantages of open elections

- It promotes hatred among people
- Some people are influenced by others during elections
- It limits people's freedom of secrecy

Activity

1. Name the body responsible for organizing national election
2. State three roles of the above body
3. Give any two reasons why it is always important to organize regular free and fair elections in the country?
4. List any two challenges the Uganda electoral commission faces when carrying out its duties
5. Mention two possible solutions to problems facing the electoral commission
6. Mention any three examples of election malpractices
7. What title is given to the political head of a constituency?
8. State two disadvantages of secret ballot system
9. Mention any two election materials at a polling station on a polling day
10. List two electoral officers found at a polling station

THE GOVERNMENT OF UGANDA

Introduction to government

A government is a ruling body of a country /state

Levels of government

Central government

Local government

Difference between central government and local government

Central government	Local government
Cares for the development of the whole nation	Cares for the development of a local area
Central government is one	Local governments are many
Controls all armed forces	Controls the local defense force
Builds and maintains major roads	Builds and maintains feeder roads
Runs major hospitals	Controls local health centers

Levels of local government

Levels of local government	Units of local council	Political leader
Village	LC 1	Chairperson LC I
Parish	LC 2	Chairperson LC II
Sub county	LC 3	Chairperson LC III
District	LC 5	Chairperson LC V

Types of government

- Democratic government
- Monarchical government
- Dictatorial government
- Autocratic government

Systems of government

- Multi-party system of governance
- Single party system of governance

Single party system

- This is the type of political party system in which one political party operates in a country

Advantages of single party system

- It promotes unity among people
- There less conflicts for power in a country
- It is easy and cheap to conduct elections

Disadvantages of single party system

- It promotes dictatorship
- There is no room for new idea
- It encourages corruption among government officials

Multi-party system

- This is the system of government where there are many political parties competing for power to control the nation

Advantages of multi-party system

- It promotes respect for human rights
- There is room to choose better leaders
- It creates room for new ideas

Disadvantages of multi-party system

- Decisions and programs take long to be worked on

- Many political parties may lead to conflicts and disunity among people
- It is expensive to implement

Organs/arms of a democratic government

- Executive
- Legislature
- Judiciary

Executive

- It is the main administrative organ of the government
- It is made up of president, ministers and civil servants
- It is headed by the president

The president

- He/she is the political head of the country
- He chairs cabinet meetings
- He is the commander in chief of the armed forces in Uganda
- He approves parliamentary bills
- He represents the country internationally

The minister

- The minister is the title given to the head of a ministry
- A permanent secretary is the highest civil servant in a ministry
- The chief minister is known as prime ministers. He/she is in charge of government business
- The president and all ministers are referred to as the cabinet

The civil servants

- Civil servants are people who work for the government
- The head of all civil servants in every ministry is the permanent secretary
- The head of all civil servants in a district is the chief administrative officer (CAO)
- All civil servants are under the ministry of public service

Duties of the executive

- To plan for the country
- To implement government policies /programs
- To maintain law and order in the country
- To collect and spend government revenue

Legislature

- It is sometimes called the national assembly or parliament
- It is headed by the speaker of parliament
- It is made up of members of parliament (MPs)

Composition of the legislature

- Members directly elected to represent constituencies
- District women representative
- Representative of special interest groups e.g., workers, army, youth, PWD
- Ex-offices: -these are ministers without constituencies
- One becomes a member of parliament by winning parliamentary elections and being elected to represent a special interest group

Officers in parliament

The speaker of parliament

He chairs meetings/debates in the parliament

Deputy speaker

He/she chairs debates when the speaker is not around

Clerk to parliament

He/she records and keeps proceedings /minutes of the debate (Hansards)in the parliament

sergeant at arms

He keeps security in the parliament

He carries the mace as the speaker enters the house

DUTIES OF A LEGISLATURE

- To make and amend laws
- To approve the national budget
- To check on government expenditures
- To approve government officials who have been appointed by president

A bill is: this is a proposed law in the parliament. A bill becomes a law /an act when the president has signed it.

An act: is a law that has been passed by the parliament and signed by the president

Activity

1. What is a government?
2. State any one difference between the central government and the local government
3. Name the body that is responsible for building major roads in Uganda
4. What title is given to the political head of a
 - i. Subcounty
 - ii. District
5. Mention the three arms of a democratic government
6. Mention any two instruments of power given to the president on the swearing in ceremony
7. How is the president important to the legislature?
8. What title is given to the;
 - i) Political head of a ministry
 - ii) Highest civil servants in a ministry
 - iii) Highest civil servants in a district
9. How is the work of a legislature similar to that of the defunct LEGCO?
10. How does the chief justice help the president to attain leadership powers?
11. State one role performed by the following people in parliament
 - i) Speaker of parliament
 - ii) Sergeant of parliament
12. Mention any two examples of civil servants

Judiciary

- It is headed by the chief justice
- The chief justice is appointed by the president and is approved by the parliament
- The judiciary uses laws made by the parliament when punishing law breakers

Composition of the judiciary

- Chief justice

- Lawyers
- Magistrates
- Judges
- Principle judge
- Duties of the judiciary
- To punish law breakers
- To interpret laws
- To settle disputes among people in the court
- Roles of the chief justice
- He is the head of the supreme court
- Swearing in the president
- He/she guides the judges and magistrate on how to perform their work

Types of courts

- Local council
- Magistrate courts
- The high court
- The supreme court

Duties of the government

- To provide social services to its citizens
- To maintain law and order in the country
- To promote national development
- To defend the country against attacks
- To pay civil salaries of civil servants
- To conduct national elections

Problems faced by the government when providing social services

- Shortage of funds
- Corruption
- Bad weather
- Insecurity in some areas
- High levels of illiteracy
- Poor transport and communication network
- Outbreak of epidemic diseases like COVID 19
- High population growth

Solution to the problems government faces when providing social services

- By providing good security in the country
- By enforcing laws against corruption
- By improving on the transport network
- Encouraging the use of family planning methods

THE NATIONAL CONSTITUTION

- A constitution is a set of laws by which a given community is governed
- A national constitution is a set of laws used to govern a country
- By-Laws are laws that are made by the local government

Uganda's constitution since independence

- i) The 1962 independence constitution

- ii) The 1966 constitution
- iii) The 1967 constitution

Results of the 1967 constitution

- Uganda became a republic
- All kingdoms in Uganda were abolished
- The president was given more powers to rule the country than the prime minister
- The 1995 constitution
- It was called the people's constitution because it was made basing on people's views
- Justice Benjamin Odoki was the head of the constitutional commission that collected views from the majority of the citizens all over the country

Importance of the national constitution

- It promotes democracy
- It promotes peaceful change of leadership
- It protects the rights of the citizens
- It promotes good governance
- It is used to settle cases peacefully

Relationship between the constitution and the elections

- The constitution defines the duration for conducting elections
- It sets conditions to participate in elections
- It states the functions of the electoral commission

How a constitution promotes democracy

- It allows people to choose their choice
- It defines the right of people in the country
- It defines the time for conducting national elections

Activity

1. How does the legislature help the judiciary to do perform its work?
2. Apart from settling disputes among people, state two other duties of the judiciary
3. Identify any two ways law breakers are fined by courts of law
4. State any two roles performed by the government
5. List two problems faced by the government when providing social services
6. How can any of the above problem be solved?
7. Name any two groups of people found under the judiciary
8. Give the meaning of each of the following: -
 - a) A constitution
 - b) By-laws
9. How is a constitution important to a country like Uganda? (state two ways)
10. How does the constitution promote democracy?
11. Which constitution is referred to as the: -
 - i. Republican constitution
 - ii. Pigeon hole constitution
12. Why is 8th October 1995 recommended in the history of Uganda?

COMMUNICATION

Communication is the sending and receiving of messages

Types of communication

Verbal communication

Nonverbal communication

Methods of communication

- Traditional methods
- Using drum, whistle, bell, smoke, signal etc.
- Modern methods
- Using newspapers, radios, telephones, magazines etc.

Mass media

- This is the sending and receiving of messages to many people at the same time
- This includes radios, televisions, newspapers, magazines etc.

Uganda communications commissions (UCC)

- Is responsible for regulating the communication sector in Uganda

Barriers of communication

- Illiteracy among people
- Poverty among people
- Poor networking
- High costs of communication means
- High taxes imposed on communication companies
- Lack of national language
- A national language is a language approved to be used by all people in the country
- Uganda has no national language because it has many tribes/languages

Possible solutions to barriers of communication

- By charging low taxes on communication companies
- By introducing a national language
- By lowering the cost of communication means
- By providing free education

Importance of communication (importance of a national language)

- It promotes trade
- It promotes national unity
- It promotes peace in the country

Government revenue

- Government revenue is money got by the government from different sources
- The main source of government revenue is taxation

Sources of government revenue

- Taxation
- Grants
- Loans
- Donation
- Tourism
- Sale of electricity
- Court fines and traffic fines

- Sale of minerals
- Licenses etc.

Taxation

- Taxation is the system of imposing taxes on people
- Taxes is money charged by the government on people, services, goods and organisations.

Types of taxes

- Direct tax
- This is the tax collected directly from the person e.g. property tax, income tax ((PAYE)

Customs Tax

- This is a tax paid on imports

Excise tax

- This is a tax paid on goods produced within the country

VAT

- This is tax paid by all people who buy goods and services

Groups of people exempted from paying taxes

- Prisoners
- House maids
- Elderly people
- Students

Reasons for paying taxes

- To Provide money to pay civil servants
- Government gets money to provide social services
- To provide money to support government programmes

Why some people do not pay taxes

- Taxes are too high
- Some lack knowledge about the importance of paying tax
- Some revenue collectors are corrupt

Whys people can be encouraged to pay tax

- Carrying out tax education
- Reducing on taxes paid

Activity

1. What term is used to mean sending and receiving messages to many people at the same time?
2. Name the body that is responsible for regulating media services in Uganda
3. State any two challenges hindering effective communication in Uganda
4. How does communication promote trade in an area?
5. Mention any three sources of government revenue
6. Name the type of tax charged on
 - i. Locally manufactured goods
 - ii. Imported goods

7. Mention the two types of taxes
8. How is the national language important to a country like Uganda? (list two ways)
9. Give a reason why Uganda has no national language
10. List two examples of mass media
11. What is the major source of government revenue?
12. Identify two reasons why people should pay tax to government

UGANDA REVENUE AUTHORITY

DUTIES OF UNRA

- To collect taxes
- To assess tax
- To conduct tax education
- To control smuggling

Problems facing URA

- Smuggling of goods
- Corrupt revenue officers
- Tax evasion /tax defaulting

Possible solutions to the problems facing URA

- By educating the public on the importance of paying taxes
- By paying attractive salaries to revenue officers

Dangers of smuggling

- It reduces government revenue
- It may lead to importation of low-quality goods into the country
- Expired goods can be imported in the country
- It lowers market for locally manufactured goods

Ways of controlling smuggling

- By enforcing laws against smuggling
- Reducing on taxes paid on goods
- By employing honest revenue officers

Budgeting

- A budget is an estimate of income and expenditure for a given time
- National budget is a country's estimate of income and expenditure for a financial year.
- A financial year is a period of one year in which a national budget is implemented. A financial year begins on 1st July and ends on 30th June the following year.
- The ministry of finance, planning and economic development

Parts of a budget

- Income
- Expenditure

Importance of making a national budget

- It helps the government to identify the sources of income

- It helps the government to cater for priorities
- It helps the government to avoid unexplained expenditures

Types of budgets

- Surplus budget
- Balanced budget
- Deficit budget

Surplus budget

- A surplus budget is a type of budget where by the income is greater than the expenditure
- A diagram showing a surplus budget

Advantages of a surplus budget

- It promotes development
- It encourages saving
- It limits debts

Balanced budget

- This is the type of budget where income is equal to the expenditure

Deficit budget

- A deficit budget is a type of budget where by the expenditure is more than the income

A diagram showing a deficit budget

Disadvantages of a deficit budget

- By widening the tax base
- By privatization
- By diversifying the economy of the country
- By mechanizing agriculture
- By attracting investors in the country

Government expenditure

- This refers to ways how government spends its income

How the government spends its revenue

- By building schools (providing education services)
- By paying civil servants
- By building hospitals (providing health services)
- By buying weapons
- By constructing roads
- By funding developmental programmes e.g. NAADS etc.

Activity

1. Name the body that is responsible for collecting taxes in Uganda
2. State any two problems the above body faces when carrying out its work
3. Which bad practice among traders prevents government from taxes on goods
4. How does smuggling affect the development of the country?
5. Mention the two parts of a budget

6. Name the government ministry responsible for making a national budget
7. Mention the three types of a budget
8. Give any two ways budgeting is important to an individual
9. State one advantage of having a deficit budget
10. Which problems are likely to be faced by a school which experienced a deficit budget?
11. Why should the government widen the tax base?
12. Identify two ways how the government spends its revenue
13. Which problems is likely to be faced by the government when spending its revenue?

RIGHTS AND RESPONSIBILITIES OF CITIZENS

Citizenship

- This is the legal right of belonging to a particular country
- A citizen is a person who has the legal right of belonging to a particular country

How one acquires citizenship of Uganda

- Through birth
- A person becomes a citizen when his or her parents are citizens in that particular country
- Through descent
- A person becomes a citizen if his or her ancestors were citizens in that particular country

Through naturalization

- This is becoming a citizen after having spent a very long period of time in a particular country

Through adoption

- a person becomes a citizen if he is below 18 years of age whose parents are unknown and he is adopted by citizens of Uganda

Types of citizenship

- Single citizenship
- Dual citizenship

Ways of losing citizenship

- By spying against your country
- By joining the army of an enemy country to fight Uganda
- If one's citizenship was acquired unlawfully /by fraud

Duties of a citizen

- To pay taxes promptly
- To defend the country
- To help in maintaining law and order
- To respect the rights and freedoms of other people

How citizens help in keeping law and order

- By reporting law breakers
- By helping the police to investigate crime
- By obeying laws

CHILDRENS RIGHTS

- Childrens rights are basic natural freedoms every child should have

Examples of children's rights

- A right to play
- A right to medical care
- A right to have a name
- A right to food
- A right to education

Importance of children's rights

- They protect children from harm
- They promote respect for children
- They help children to have a bright future

People who promote children's rights

- Parents
- Teachers
- Local leaders
- Religious leaders

Child abuse

- Child abuse is the violation of children's rights
- Forms of child abuse
- Physical child abuse
- Emotional child abuse

Examples of child abuse practices

- Defilement
- Child labour
- Denial of food
- Child sacrifice
- Child neglect
- Kidnapping

Causes of child abuse

- Poverty
- Alcoholism
- Wars
- Death of parents
- Separation of parents (divorce)
- Indiscipline of children

Groups of people who abuse children's rights

- Insane people
- Alcoholist
- Some parents
- Some children

How children can lead to abuse of their rights

- By walking alone at night
- By accepting gifts from strangers
- By staying in lonely places
- By being disobedient /undisciplined

Effects of child abuse

- It leads to death of children
- It causes injuries to the body
- It leads to early pregnancies
- It leads to disease infections

Ways of controlling child abuse

- By encouraging children to move in groups
- By reporting people who carry out child abuse
- By educating the public (people) about children's rights
- By enforcing strict laws against child abuse

Activity

1. Give the meaning of the term citizenship
2. Mention three ways one can acquire citizenship
3. State two obligations of a good citizen
4. How can one lose citizenship
5. What name is given to an official government document that permits one to travel to other countries
6. In which way is the national identity card useful to the citizen of Uganda?
7. Give two ways children can contribute towards the violation of their rights
8. Mention any two forms of child abuse
9. Give any two ways cases of child abuse can be reduced in the society today
10. Identify two examples of children's rights that are provided
11. State two effects of child abuse
12. Name the official on the LCI committee responsible for children's rights

CHILD LABOUR

- Child labour is when children are employed to do works
- Forms of child labour
- Employing children as house maids
- Employing children in mines
- Employing children to work on building sites
- Carrying heavy goods for people

Causes of child labour

- Poverty
- Death of parents
- Need for cheap labour
- Lack of knowledge about children's rights

Effects of labour

- It leads to diseases
- It leads to school drop outs
- It can lead to body injuries
- It can lead to death of children
- It can lead to early marriages

Ways of controlling child labour

- By enforcing strict laws against child labour
- By educating people about the dangers of child labour

- By reporting people who carry out child labour

Human rights

Human rights are natural freedoms every person should have

Examples of human rights

- The right to life
- Freedom to move
- The right to own property
- The right to fair trial
- Freedom to worship

Ways human rights are abused

- Imprisonment without trial
- Denial of freedom of movement
- Raping of women
- Torturing people

Bodies in Uganda that protect human rights

- Uganda human rights commission
- Amnesty international

Activity

1. Give the meaning of human rights
2. Mention two examples of fundamental human rights
3. Name the body that is responsible for protecting the rights of people in Uganda
4. State one role a citizen can play to protect other people's rights
5. Give any two ways children are subjected to child labour in the society today
6. Mention two ways child labour affects children in your community
7. Give any two ways child abuse practices can be reduced in your community
8. List three examples of fundamental human rights
9. Apart from the Uganda human rights commission, state any other body that protects people's rights in Uganda

Population size and distribution

Terms related to population

Population is the total number of people living in an area at a given time.

Population distribution is the way people are spread in an area.

Population growth is the gradual / steady increase in the number of people living in an area

Population explosion is the sudden increase in the number of people in an area.

Population census is the official counting of people in an area

Population density is the number of people living in an area per square kilometre

Population structure is the number (composition) of people in terms of age and sex

Demography is the study of human population

Overpopulation is the situation when the number of people living in an area is bigger than the available resources

Underpopulation is the situation when the number of people living in an area is smaller than the available resources.

Enumerators are officials who carry out a population census

Census night is the night before the day of the national population census

Population census

This is the official counting of people in a country

Information recorded during a population census

- Age of the family members
- Number of children in the family
- Sex of family members
- Occupation of the people in a family
- Levels of education of family members

Reasons why the population of Uganda is carried out after every ten years

- It is very expensive to carry out every year
- To allow population changes to take place

Reasons for conducting a national population census

- For proper planning
- To determine the birth and the death rates
- To know the total number of people in the country
- To determine the population structure
- To determine level of literacy in the country

Problems faced by enumerators during population census.

- Harsh weather conditions
- Moving long distances
- Insecurity in some areas
- Poor transport network in some areas

Problems faced by the government during a national population census

- Shortage of funds
- Insecurity in some areas
- Poor transport network in some areas
- Wrong information given by some people

UBOS is the body responsible for conducting a national population census

- The ministry of finance planning and economic development organizes the census exercise in Uganda

Population distribution

Population distribution is the way people are spread in an area.

Types of population distribution

- Densely population
- Sparse population
- Sparsely population (when an area has very few people compared to the size of an area that are sparsely populated)
- Semi-arid areas
- Areas with civil wars
- Forested areas
- Areas affected by natural disasters etc.

Why the above areas are sparsely populated

Semi – arid areas

- They have infertile soils
- The areas receive very little rainfall
- Forested areas
- They have many disease vectors
- They harbour animals that can be dangerous to people

Areas with civil wars

- They have high death rates
- Trade is difficult
- Areas with natural disasters
- Movement is difficult
- Death rates
- Trade is difficult

Factors that lead to a low population

- Poor social service in an area
- Poor/infertile soils
- Unreliable rainfall
- Disease outbreak

Dense population

- This is when an area has many people compared to the size of land
- Areas with dense population and reasons why

Lake shores and riverbanks

- They have fertile soils for crop growing
- They receive reliable rainfall
- they promote fishing

Urban areas

- They have many job chances
- They have large market for goods
- They have better social services

Mountain slopes

- They have fertile soils for crop growing
- They receive reliable rainfall
- They have plenty of minerals

Plateau areas

- They have fertile soils for crop growing
- They have lakes and rivers which promote fishing
- They receive reliable rainfall which supports crop growing

Factors that lead to a dense/high population

- Reliable rainfall
- Presence of job chances
- Industrialization
- Presence of natural resources

Factors that influence population distribution and how**Rainfall distribution**

- Areas that receive reliable rainfall are densely populated because support farming

Nature of soil

- Areas with infertile soils are sparsely populated because they cannot support plant growth. Areas with fertile soil have many people because they support plant growth.

Vegetation distribution

- Areas that have thick vegetation have few people because they harbour dangerous animals and disease vectors

Social services

- Areas with good social services are densely populated unlike areas with poor social services
- Political stability
- Areas that are politically stable have more people than areas with wars.
- Other factors include urbanization, government policy

Activity

1. Give the meaning of the term population
2. Name the body that is responsible for conducting national census in Uganda
3. Mention any two types of information that is collected by enumerators during the census.
4. Give any reason why government conducts national census every after ten years?
5. State any two problems government faces when conducting the national census
6. Mention any three factors that influence population distribution
7. Give two reasons why slopes of some mountains are densely populated
8. Why are areas near lakes and rivers densely populated (state two reasons)
9. State two examples of sparsely populated areas.
10. Why are areas with civil wars sparsely populated? (List two reasons)
11. Which ministry is responsible for organizing national census in Uganda
12. After how many years should a national census be carried out

Population growth

- Population growth is the gradual increase in the number of people in an area

Factors that encourage population growth

- High fertility rate among women
- Early marriages
- Improved medical services
- Polygamous marriages
- Refugee influx

Cultural factors that promote population growth

- Polygamy
- Producing children for prestige
- Forced early marriages

Advantages of population growth

- It creates large market for goods

- The government collects more tax from people
- It creates presence of enough labour force

Disadvantages of population growth

- It leads to shortage of land
- It leads to development of slums
- It leads to easy spread of communicable diseases
- It leads to unemployment
- It leads to high crime rate

Ways of controlling population growth

- By promoting girl child education
- By discouraging polygamy
- By discouraging early marriages
- By encouraging people to use family planning methods

Natural disasters that affect population growth

- Volcanic eruption
- Lightning
- Landslides/mud slides
- Storms
- Drought Etc.

Man made factors that affect population growth

- Road accidents/plane crash
- Wars
- Fire outbreaks

Refugee

- Is a person who has been forced to leave his or her country due to disasters.

Causes of refugees

- Civil wars
- Floods
- Volcanic eruptions
- Famine

Population explosion

This is the sudden /rapid increase in the number of people in an area

The major causes of population explosion are civil wars and natural disasters.

Population density

This is the number of people living in an area per square kilometre

How to determine population density

$$\text{Population density} = \frac{\text{Total population (people)}}{\text{Total area (km}^2\text{)}}$$

Examples

An area has a population of 40,000 people, living in an area of 2000km². calculate the population density of that area

$$PD = \frac{\text{total population}}{\text{total area}}$$

$$PD = \frac{40,000}{2000} = 20$$

$$PD = 20 \text{ people km}^2$$

Types of population density

- High population density
- This is when there are many people per square kilometer
- Shores of lakes, mountain slopes, major cities and towns have a high population

Advantages of a high population

- It creates a large market for goods
- It creates a large labour force
- High revenue is collected in terms of taxes
- It promotes proper utilization of resources in an area.

Disadvantages of a high population

- It leads to development of slums
- It leads to easy spread of diseases
- It leads to high unemployment level
- High crime rates
- Environmental degradation

Solutions to problems associated with a high population density

- Building storeyed houses
- Extending electricity to rural areas
- Empowering the youth to start small scale businesses

Low population density

- This is when there are few people per square kilometre

Advantages of low population

- Low crime rate
- People having enough land

Disadvantages/problems of low population

- There is low market for goods
- There is low labour force
- There is under utilisation of resources
- There is low tax base

Solution to a low population density

- By improving social services to attract more people
- Promoting industrialisation
- By increasing food population

Effects of HIV/AIDS on population

- HIV/AIDS stands for human immune deficiency virus
- Aids stands for acquired immune deficiency syndrome
- TASO -the AIDS support organization

How TASO helps aids patients

- It provides them with counselling services
- It provides them with ARVS(ant retroviral drugs)
- It provides relief aid in terms of food

How AIDS is spread

- By sharing sharp objects with an infected person
- Having unprotected sexual intercourse with an infected person.
- Through blood transfusion with an infected person
- Using unsterilised sharp objects during some cultural practices like circumcision
- Use of ABC to prevent AIDs
- A- abstain from sex (to unmarried people)
- B- be faithful to your partner (to married people)
- C- condom use

Effects of HIV/AIDS on population

Social effects

- It leads to death of people
- It causes misery to the infected person
- It leads to isolation
- It leads to many orphans

Economic effects of HIV/AIDS on population

- It leads to low efficiency at work
- It leads to death of labour force
- Government spends a lot of money treating AIDS victims
- It leads to poverty in a family as a result of spending a lot of money buying drugs and treating those infected with AIDs

Activity

1. Give any two causes of high population growth in Uganda
2. Mention any two advantages of a high population
3. Calculate the population density of town N which has a population of 20,000 people living in an area of 20km²
4. State any two effects of HIV/AIDs on the development of an area.
5. List two natural disasters that can affect population growth
6. How is low population useful to a country like Uganda? (State two ways)
7. In which two ways does TASO help AIDs victims?
8. Give ways how a low population affect industries in terms of: -
 - i) Market
 - ii) Labour force
9. In which ways can the government control population growth?
10. Write the following in full
 - a) TASO
 - b) AIDs
