

Wednesday, 31st January, 2024.

Time: 7:30 a.m - 8:30 a.m.

Neat work is my responsibility.

THE LOCATION OF UGANDA ON THE MAP OF EAST AFRICA.

- > Uganda is located in the Eastern part of ~~East~~ Africa (East Africa)
- > Uganda is divided into small political regions.

List down the regions that make up Uganda.

- > Central region
- > Eastern region
- > Western region
- > Northern region
- > Northeastern region

List down some districts in the Central region of Uganda.

- > Kampala District
- > Wakiso District
- > Mukono District

List down some districts found in the Eastern region of Uganda.

- > Mbale District
- > Iganga District
- > Jinja District

List down some districts found in the Western part of Uganda.

> Hoima District

List down some districts found in the Northeastern region in Uganda.

> Moroto District

> Kotido District

> Amuria District

List down some examples of highland districts in Uganda.

> Bundibugyo District

> Mbale District

> Kasese District

List down some examples of island districts in Uganda.

> Kalangala District

> Buvuma District

List down some newly created districts in Uganda.

> Kakumiro District

> Kagadi District

> Omoro District

> Buikwe District

Mention some reasons why the government of Uganda creates new districts.

> To make administration easy.

> To extend social services nearer to people.

> To create more jobs for people.

Time: 2:00-2:50 pm.

Write neatly

Mention some problems faced by people in Kankangala District.

- » Poor road network
- » Low employment opportunities.
- » Poor health services
- » Shortage of market for goods.

List down some ways of locating places.

- » By using a compass.
- » By using landmarks.
- » By using the position of the sun.

Mention some ways of locating places on a map.

- By using Longitudes and latitudes. (grid reference)
- By using a compass direction.
- By using neighbouring places.

What is grid reference?

- * Grid reference is the method of locating places on a map using Longitudes and Latitudes.

What are Latitudes?

- * Latitudes are the imaginary lines drawn on a map or a globe from East to West.

- * Latitudes are also called Lines of Latitude.

- * The general name given to all Latitudes is Parallels.

List down the major lines of latitude.

- The Arctic Circle ($66\frac{1}{2}^{\circ}\text{N}$)
- The Tropic of Cancer ($23\frac{1}{2}^{\circ}\text{N}$)
- The Equator (0°)
- The Tropic of Capricorn ($23\frac{1}{2}^{\circ}\text{S}$)
- The Antarctic Circle ($66\frac{1}{2}^{\circ}\text{S}$)

Note: The Equator is marked 0° because it is the starting point when naming all Latitudes.

List down some districts crossed by the Equator in Uganda.

- > Buvuma District
- > Kasese District
- > Mpigi District
- > Mukono District

List down the two lakes crossed by the Equator in Uganda.

- > Lake Victoria
- > Lake George

Activity

1. Why does Uganda lie in both the Northern and the Southern Hemisphere?

- > Uganda is crossed by the Equator.

2. What is a hemisphere?

- > A hemisphere is the half of the world when divided by the Equator or the Prime Meridian.

3. How does latitude influence climate?

> Areas near the Equator are hotter than those far from it.

4. What is Equinox?

- Equinox is the period when the sun is overhead the Equator.

5. When do we find the sun overhead the Equator?

> On 21st March and 23rd September every year.

6. Mention any one month when the Sun is overhead the Equator.

> March

> September

7. What is Solstice?

- Solstice is the period when the sun is overhead the Tropics.

8. When do we find the sun overhead the Tropic of Cancer?

> On 21st June every year.

9. When do we find the sun overhead the Tropic of Capricorn?

> On 22nd December every year.

10. Mention some importance of Latitudes.

> They are used to locate places on a map.

> They are used to determine climate.

What is latitude?

- > Latitude is the distance of a place in degrees North or South of the Equator.

What are Longitudes?

- > Longitudes are the imaginary lines drawn on a map or a globe from North to South.

List down the major lines of Longitude.

- > The Prime Meridian / The Greenwich Meridian (0°)
- > The International Date Line / IDL (180° East or West)

Note: The Prime Meridian is marked 0° because it is the starting point when naming all Longitudes.

Thursday, 1st February, 2024.

Time: 2:50-3:40 p.m.

Discipline is a key to success.

List down the countries that share borders with Uganda.

- Kenya (in the East)
- DRC (in the West)
- South Sudan (in the North)
- Tanzania (in the South)
- Rwanda (in the Southwest)

Note: Uganda is a landlocked country.

What is a landlocked country?

- A landlocked country is a country without her own seaport.

OR

→ A landlocked country is a country without a coastline.

List down the landlocked countries that neighbour Uganda.

→ South Sudan (in the North)

→ Rwanda (in the Southwest)

Apart from Uganda and Rwanda, mention the other landlocked country in East Africa.

→ Burundi

Mention the two seaports that handle some imports and exports of Uganda.

→ Port Mombasa (in Kenya)

→ Port Dar-es-Salaam (in Tanzania)

Mention the seaport that handles most imports and exports of Uganda.

→ Port Mombasa

How is Port Mombasa economically important to Uganda?

→ Port Mombasa handles some goods of Uganda.

Apart from port Mombasa, mention the other seaport that handles goods of Uganda.

→ Port Dar-es-Salaam

Why does Uganda prefer using Port Mombasa over Port Dar-es-Salaam?

→ Port Mombasa is nearer to Uganda than Port Dar-es-Salaam.

Mention some problems faced by the landlocked countries.

- High taxes charged on some imports and exports (goods).
- Delay of some imports and exports in transit.
- Lack of privacy on some imports and exports.

Mention some ways how Uganda can solve her problems caused by being landlocked.

- By improving air transport in a country.
- By improving home industries to provide some goods locally.
-

Mention some reasons why Uganda should keep a good relationship with her neighbours.

- To promote trade with her neighbours.
- To promote security with her neighbours.

What is a non-landlocked country?

- A non-landlocked country is a country with her own seaport.

Time: 5:00 - 6:00 pm

THE PHYSICAL FEATURES IN UGANDA

1. What are physical features?

Physical features are landforms of an area.

2. List down the examples of physical features in Uganda.

- The Plateau
- Mountains

- » Hills
- » Valleys
- » Lakes
- » Rivers

Mention the physical feature that covers the largest part of Uganda.

- » The Plateau

What is a plateau?

- » A plateau is a raised flat land.

Mention some activities that are carried out on a plateau.

- » Crop growing
- » Animal rearing
- » Afforestation
- » Tourism
- » Trade

Mention the two types of physical features.

- » Relief physical features
- » Drainage physical features

What are relief physical features?

- » Relief physical features are features, which are named basing on their altitude.

List down some relief physical features.

- » Mountains
- » Hills
- » Valleys
- » The Plateau

Note: Altitude is the height of the land above the sea level.

What are drainage physical features?

Drainage physical features are features which contain water.

List down some drainage physical features-

- Lakes
- Rivers
- Streams
- Hot springs

Mention some importance of physical features to people.

- Physical features like lakes are used as fishing grounds.
- Physical features like the plateau are used for crop growing.
- Physical features like rivers are sources of water to people.

Activity

1. Which physical features covers the largest part of Uganda?

- The Plateau

2. Mention one danger of physical features to people.

- Physical features like rivers may flood and kill people.

Friday 2nd February, 2024.

Time: 7:15 - 8:15 a.m. Write neatly.

MOUNTAINS IN UGANDA

What is a mountain?

- » A mountain is a high piece of land often with rocks on top.

Mention the two types of mountains in Uganda.

- » Block Mountain / Horst Mountains.
- » Volcanic Mountains

What are block mountains?

- » Block mountains are mountains that were formed by faulting.
- » Block mountains are also called horst mountains.

What is faulting?

- » Faulting is the breaking of the earth's surface due to pressure under it.

Note: In Uganda, there is only one block mountain and others are volcanic mountains.

Name the only block mountain in Uganda.

- » Mount. Rwenzori

MOUNT RWENZORI

- » Mount Rwenzori is the highest mountain in Uganda.
- » Mount Rwenzori is sometimes called Rwenzori Ranges because it has many mountain peaks.

- » The highest peak of Mount Rwenzori is Peak Margherita.
- » The second highest peak of Mount Rwenzori is Peak Stanley.
- » Mount Rwenzori is snow capped throughout the year.
- » Mount Rwenzori is covered by snow because it crosses the snow line.
- » Henry Morton Stanley was the first European Explorer to see Mount Rwenzori.
- » H.M Stanley named Peak Stanley on Mount Rwenzori.
- » H.M. Stanley named Mount Rwenzori the Mountains of the Moon.
- » Mount Rwenzori was called the Mountains of the Moon because it had snow on top that looked like a rising moon.

Note: Mount Rwenzori creates a natural boundary between Uganda and DRC.

12
12

Good score

Activity

1. Name the highest mountain in Uganda.
» Mount Rwenzori
2. Name the highest mountain peak in Uganda.
» Peak Margherita
